INDEPENDENT AUDITORS' REPORT

To the Shareholders of Rogers Sugar Inc.

Opinion

We have audited the consolidated financial statements of Rogers Sugar Inc. (the "Entity"), which comprise:

- the consolidated statements of financial position as at September 28, 2019 and September 29, 2018,
- the consolidated statements of (loss) earnings and comprehensive (loss) income for fiscal years ended September 28, 2019 and September 29, 2018,
- the consolidated statements of changes in shareholders' equity for fiscal years ended September 28, 2019 and September 29, 2018,
- the consolidated statements of cash flows for fiscal years ended September 28, 2019 and September 29, 2018,
- and notes to the consolidated financial statements, including a summary of significant accounting policies

(Hereinafter referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated financial position of the Entity as at September 28, 2019 and September 29, 2018, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the "***Auditors' Responsibilities for the Audit of the Financial Statements***" section of our auditors' report.

We are independent of the Entity in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. Other information comprises:

- the information included in Management's Discussion and Analysis filed with the relevant Canadian Securities Commissions.
- the information, other than the financial statements and the auditors' report thereon, included in a document likely to be entitled "Glossy Annual Report".

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit and remain alert for indications that the other information appears to be materially misstated.

We obtained the information included in Management's Discussion and Analysis filed with the relevant Canadian Securities Commissions as at the date of this auditors' report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in the auditors' report.

We have nothing to report in this regard.

The information, other than the financial statements and the auditors' report thereon, included in a document likely to be entitled "Glossy Annual Report" is expected to be made available to us after the date of this auditors' report. If, based on the work we will perform on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRS), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Entity's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Entity or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Entity's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Entity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represents the underlying transactions and events in a manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
- Provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Page 4

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group Entity to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

ROGERS SUGAR INC.

2

Notes to consolidated financial statements

(In thousands of dollars except as noted and per share amounts)

1. Reporting entity:

Rogers Sugar Inc. ("Rogers" or the "Company") is a company domiciled in Canada, incorporated under the *Canada Business Corporations Act*. The head office of Rogers is located at 123 Rogers Street, Vancouver, British Columbia, V6B 3V2. The consolidated financial statements of Rogers as at September 28, 2019 and September 29, 2018 comprise Rogers and the directly and indirectly controlled subsidiaries, Lantic Inc. ("Lantic") and The Maple Treat Corporation ("TMTC"), (together referred to as the "Company"). The principal business activities of the Company are the refining, packaging and marketing of sugar and maple products.

The Company's fiscal year ends on the Saturday closest to the end of September. All references to 2019 and 2018 represent the years ended September 28, 2019 and September 29, 2018.

2. Basis of preparation:

(a) Statement of compliance:

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These consolidated financial statements were authorized for issue by the Board of Directors on November 20, 2019.

(b) Basis of measurement:

These consolidated financial statements have been prepared on the historical cost basis except for the following material items in the consolidated statements of financial position:

- (i) derivative financial instruments are measured at fair value,
- (ii) equity-settled share-based compensation, cash-settled share appreciation rights and cash-settled performance share units are measured at fair value,
- (iii) the defined benefit liability is recognized as the net total of the present value of the defined benefit obligation less the total of the fair value of the plan assets and the unrecognized past service costs; and
- (iv) assets and liabilities acquired in business combinations are measured at fair value at acquisition date, less any subsequent impairment, if applicable.

(c) Functional and presentation currency:

These consolidated financial statements are presented in Canadian dollars, since it is the Company's functional currency. All financial information presented in Canadian dollars has been rounded to the nearest thousands, except as noted and per share amounts.

2. Basis of preparation (continued):

(d) Use of estimates and judgements:

The preparation of these consolidated financial statements, in conformity with IFRS, requires management to make judgements, estimates and assumptions about future events that affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting years.

The following is a summary of areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements:

(i) Embedded Derivatives:

As at October 2, 2016, embedded derivatives, which related to the foreign exchange component of certain sales contracts denominated in U.S. currency, were no longer separated from the host contract as it was determined that the U.S. dollar is commonly used in Canada. This change in estimate was applied prospectively, as such, any contracts for which it was determined there was an embedded derivative and that needed to be separated from the host contract as of October 1, 2016 continued to be treated as such as a transitional step to meet the new interpretation. These contracts continued to be marked-to-market every quarter until all the volume on the contract was delivered. As at September 28, 2019, there were no embedded derivatives outstanding.

(ii) Useful lives of property, plant and equipment:

The Company reviews estimates of the useful lives of property, plant and equipment on an annual basis and adjusts depreciation on a prospective basis, if necessary.

(iii) Goodwill impairment:

The Company makes a number of estimates when calculating the recoverable amount of a cash-generating unit containing goodwill using discounted future cash flows or other valuation methods.

(iv) Asset impairment:

The Company must assess the possibility that the carrying amounts of tangible and intangible assets may not be recoverable. Management is required to make subjective assessments, linking the possible loss of value of assets to future economic performance, and determine the amount of asset impairment that should be recognized, if any.

(v) Income taxes:

The calculation of income taxes requires judgement in interpreting tax rules and regulations. Deferred income tax assets are recorded to the extent that it is probable that there will be adequate income in the future against which they can be utilized.

ROGERS SUGAR INC.

4

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

2. Basis of preparation (continued):

(d) Use of estimates and judgements (continued):

(vi) Pension plans:

The cost of defined benefit pension plans is determined by means of actuarial valuations, which involve making assumptions about discount rates, future salary increases, mortality rates and the future increases in pensions. Because of the long-term nature of the plans, such estimates are subject to a high degree of uncertainty.

(vii) Business combinations:

Establishing the fair value of assets and liabilities, intangible assets and goodwill related to business combinations.

(viii) Consolidation:

See Note 3(a), Basis of consolidation.

Reported amounts and note disclosures reflect the overall economic conditions that are most likely to occur and anticipated measures management intends to take. These estimates and assumptions are based on management's best estimates and judgments. Actual results could differ from those estimates. The above estimates and assumptions are reviewed regularly. Revisions to accounting estimates are recognized in the period in which estimates are revised and in any future years affected.

3. Significant accounting policies:

(a) Basis of consolidation:

(i) Subsidiaries:

The consolidated financial statements include the Company and the subsidiary it controls, Lantic Inc. ("Lantic") and its subsidiaries, TMTC, 9020-2292 Québec Inc. ("Decacer") and Highland Sugarworks Inc. ("Highland") (the latter three companies together referred to as "TMTC"). Control exists where the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date control commences until the date that control ceases. The accounting policies of subsidiaries are aligned with the policies adopted by the Company.

The Company owns 100% of the common shares of Lantic. Lantic Capital Inc., a wholly-owned subsidiary of Belcorp Industries Inc., owns the two outstanding Class C shares of Lantic. These Class C shares are non-voting, have no rights to return or risk of loss and are redeemable for a nominal value of one dollar each. The Class C shares entitle the holder to elect five of the seven directors of Lantic but have no other voting rights at any meetings of Lantic's shareholders except as may be required by law.

ROGERS SUGAR INC.

5

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(a) Basis of consolidation (continued):

(i) Subsidiaries (continued):

Notwithstanding Lantic Capital Inc.'s ability to elect five of the seven directors of Lantic, Lantic Capital Inc. receives no benefits or exposure to losses from its ownership of the Class C shares. As the Class C shares are non-dividend paying and redeemable for a nominal value of one dollar, there is no participation in future dividends or changes in value of Lantic resulting from the ownership of the Class C shares. There is also no management fee or other form of consideration attributable to the Class C shares. The determination of control involves a high degree of judgement. Based on all the facts and available information, management has concluded that the Company has control of Lantic.

Inter-company balances and transactions, and any unrealized income and expenses arising from inter-company transactions, are eliminated in preparing the consolidated financial statements.

(ii) Business combinations:

Business combinations are accounted for using the acquisition method when control is transferred to the Company. The consideration transferred in the acquisition is generally measured at fair value of the assets transferred, and any debt and equity interests issued by the Company on the date control of the acquired company are obtained. The consideration transferred includes the fair value of any liability resulting from a contingent consideration arrangement. Contingent consideration classified as a liability that is a financial instrument is subsequently remeasured at fair value, with any resulting gain or loss recognized in the consolidated statements of (loss) earnings and comprehensive (loss) income.

Acquisition-related costs, other than those associated with the issue of debt or equity securities, are expensed as incurred and are included in administration and selling expenses in the consolidated statements of (loss) earnings and comprehensive (loss) income. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are generally measured initially at their fair values at the acquisition date.

ROGERS SUGAR INC.

6

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(b) Foreign currency transactions:

Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the exchange rate in effect at that date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated at the rate prevailing at the date that the fair value was determined. Foreign denominated non-monetary assets and liabilities that are measured at the historical costs are translated at the rate prevailing at the transaction date. Revenues and expenses denominated in foreign currencies are translated into the functional currency at the rate in effect on the dates they occur. Gains or losses resulting from these translations are recorded in net (loss) earnings of the period.

(c) Foreign operations:

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on business combinations, are translated to Canadian dollars at exchange rates at the reporting date. The income and expenses of foreign operations are translated to Canadian dollars at the average exchange rate in effect during the reporting period.

Foreign currency differences are recognized in other comprehensive income (loss) in the accumulated foreign currency translation differences account. When a foreign operation is disposed of in its entirety or partially such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. If the Company disposes of part of its interest in a subsidiary but retains control, then the relevant proportion of the cumulative amount is reattributed to non-controlling interest. When the Company disposes of only part of an associate or joint venture while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to income or loss.

(d) Cash:

Cash includes cash on hand, bank balances and bank overdraft when the latter forms an integral part of the Company's cash management.

(e) Inventories:

Inventories are valued at the lower of cost and net realizable value. The cost of inventories is determined on a first-in, first-out basis and includes expenditures incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

ROGERS SUGAR INC.

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(f) Property, plant and equipment:

Property, plant and equipment, with the exception of land, are recorded at cost less accumulated depreciation and any accumulated impairment losses. Land is carried at cost and is not depreciated.

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located, and borrowing costs on qualifying assets. Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment. When significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Construction-in-progress assets are capitalized during construction and depreciation commences when the asset is available for use.

The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

Gains and losses on disposal of items of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of the property, plant and equipment and are recognized in cost of sales for assets used in production and in administration and selling expenses for all other assets.

Depreciation related to assets used in production is recorded in cost of sales while the depreciation of all other assets is recorded in administration and selling expenses. Depreciation is calculated on a straight-line basis, after taking into account residual values, over the estimated useful lives of each component of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Significant components of individual assets are assessed and, if a component has a useful life that is different from the remainder of that asset, then that component is depreciated separately. The estimated useful lives are as follows:

Barrels	6 years
Buildings	20 to 60 years
Furniture and fixtures	5 to 10 years
Machinery and equipment	5 to 40 years

ROGERS SUGAR INC.

8

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(f) Property, plant and equipment (continued):

Finance leased assets are depreciated over the shorter of the lease term and their useful lives.

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and depreciation is adjusted on a prospective basis, if necessary.

(g) Intangible assets:

(i) Goodwill:

Goodwill is measured at the acquisition date as the fair value of the consideration transferred less the fair value of the net identifiable assets of the acquired company or business activities. Goodwill is not amortized and is carried at cost less accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the asset might be impaired.

(ii) Other intangible assets:

Intangible assets that are acquired by the Company and have finite useful lives are initially measured at cost. Following initial recognition, intangible assets are measured at cost less accumulated amortization and accumulated impairment losses. Subsequent expenditures are capitalized only when they increase the future economic benefits embodied in the specific asset to which it relates. All other expenditures are recognized in profit or loss as incurred.

Amortization is calculated over the cost of the asset, less its residual value. Amortization is recognized in administrative expenses on a straight-line basis over the estimated useful lives of the intangible assets from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Amortization of intangible assets not in service begins when they are ready for their intended use. The estimated useful lives are as follows:

Software	5 to 15 years
Customer relationships	10 years
Other	10 years

Brand names are not amortized as they are considered to have an indefinite life.

ROGERS SUGAR INC.

9

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(g) Intangible assets (continued):

(ii) Other intangible assets (continued):

Intangible assets with indefinite useful lives are tested for impairment annually or more frequently if events or changes in circumstances indicate that the asset might be impaired.

For intangible assets with finite life, useful lives and residual values are reviewed at each financial year-end and amortization is adjusted on a prospective basis, if necessary.

(h) Leased assets:

Leases for which the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition, the leased asset is measured at an amount equal to the lower of its fair value and present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

Other leases are operating leases and the leased assets are not recognized in the Company's consolidated statements of financial position.

(i) Impairment:

Non-financial assets:

The carrying amounts of the Company's non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill, and intangible assets that have indefinite useful lives, the recoverable amount is estimated yearly at the same time, at year-end, and whenever there is an indication that the asset might be impaired.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit", or "CGU").

The Company's corporate assets do not generate cash inflows. If there is an indication that a corporate asset may be impaired, then the recoverable amount is determined for the CGU to which the corporate asset belongs.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of a CGU are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amount of the other assets in the CGU.

ROGERS SUGAR INC.

10

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(i) Impairment (continued):

Non-financial assets (continued):

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or group of assets.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognized in prior years are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(j) Employee benefits:

(i) Pension benefit plans:

The Company provides post-employment benefits through defined benefit and defined contribution plans. The Company also sponsors Supplemental Executive Retirement Plans ("SERP"), which are neither registered nor pre-funded. Finally, the Company sponsors defined benefit life insurance, disability plans and medical benefits for some retirees and employees.

Defined contribution plans

The Company's obligations for contributions to employee defined contribution pension plans are recognized as employee benefit expense in profit or loss in the years during which services are rendered by employees.

Defined benefit plans

The Company maintains some contributory defined benefit plans that provide for pensions to employees based on years of service and the employee's compensation. The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior years, discounting that amount and deducting the fair value of any plan assets. The discount rate is the yield at the reporting date on AA credit-rated bonds that have maturity dates approximating the terms of the Company's obligations and that are denominated in the same currency in which the benefits are expected to be paid.

ROGERS SUGAR INC.

11

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(j) Employee benefits (continued):

(i) Pension benefit plans (continued):

Defined benefit plans (continued)

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Re-measurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive (loss) income. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. Costs related to plan settlements are recorded at the time the Company is committed to a settlement as a separate constructive obligation. Subsequent to the Company being committed to a settlement, the plan liability is measured at the expected settlement amount using settlement interest rates.

(ii) Short-term employee benefits:

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognized for the amount expected to be paid under cash incentive if the Company has a present legal or constructive obligation to pay the amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

(iii) Share-based compensation:

The Company has a Share Option Plan. Share-based payment awards are measured at fair value at the grant date, which is recognized as a personnel expense, with a corresponding increase in contributed surplus over the vesting period, which is normally five years. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service conditions are expected to be met. Any consideration paid by employees on exercise of share options is credited to share capital.

ROGERS SUGAR INC.

12

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(j) Employee benefits (continued):

(iv) Employee share purchase plan:

The Company has an Employee Share Purchase Plan that is an equity-settled share-based payment with employees; the measurement is based on the grant-date fair value of the equity instrument granted. As such, the expense is recognized when the employee purchases the shares.

(v) Cash-settled Share Appreciation Rights:

The Company's Share Option Plan allows for the issuance of Share Appreciation Rights ("SARs") that entitles certain senior personnel of the Company to a cash payment based on the increase in the share price of the Company's common shares from the grant date to the vesting date. The SARs are automatically exercised upon vesting dates if the share price of the Company's common shares is greater than the price on the grant date; if not, they are rolled to the next vesting date.

A liability is recognized for the services acquired and is recorded at the fair value of the SARs in other non-current payables, except for the current portion recorded in trade and other payables, with a corresponding expense recognized in selling and administration expenses over the period that the employees become unconditionally entitled to the payment. The fair value of the employee benefits expense of the SARs is measured using the Black-Scholes pricing model.

Estimating fair value requires determining the most appropriate inputs to the valuation model including the expected life of the SARs, volatility, risk-free interest rate and dividend yield and making assumptions about them. At the end of each reporting period until the liability is settled, the fair value of the liability is remeasured, with any changes in fair value recognized in the consolidated statements of (loss) earnings and comprehensive (loss) income of the current year.

(vi) Cash-settled Performance Share Units

The Company implemented a Performance Share Units plan ("PSU") entitling certain senior personnel to a cash payment. A liability is recognized in payables for the services acquired and is recorded at fair value based on the share price of the Company's Common Shares with a corresponding expense recognized in administration and selling expenses. The amount recognized as an expense is adjusted to reflect the number of units for which the related service and performance conditions are expected to be met, such that the amount ultimately recognized as an expense is based on the units of awards that do meet the related service and non-market performance conditions at the vesting date. At the end of each reporting period until the liability is settled, the fair value of the liability is re-measured, with any changes in fair value recognized in the consolidated statement of (loss) earnings. The fair value of the employee benefits expense of the PSUs is measured using the Monte Carlo pricing model.

ROGERS SUGAR INC.

13

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(j) Employee benefits (continued):

(vii) Termination benefits:

Termination benefits are expensed at the earlier of when the Company can no longer withdraw the offer of those benefits and when the Company recognizes costs for a restructuring. If benefits are not expected to be fully settled within 12 months of the end of the reporting period, they are discounted.

(k) Provisions:

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance costs.

(i) Asset retirement obligation:

The Company recognizes the estimated liability for future costs to be incurred in the remediation of site restoration in regards to asbestos removal and disposal of such asbestos to a landfill for hazardous waste, and for oil, chemical and other hazardous materials storage tanks, only when a present legal or constructive obligation has been determined and that such obligation can be estimated reliably. Upon initial recognition of the obligation, the corresponding costs are added to the carrying amount of the related items of property, plant and equipment and amortized as an expense over the economic life of the asset, or earlier if a specific plan of removal exists. This obligation is reduced every year by payments incurred during the year in relation to these items. The obligation might be increased by any required remediation to the owned assets that would be required through enacted legislation.

(ii) Contingent liability:

A contingent liability is a possible obligation that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not within the control of the Company, or a present obligation that arises from past events (and therefore exists), but is not recognized because it is not probable that a transfer or use of assets, provision of services, or any other transfer of economic benefits will be required to settle the obligation, or the amount of the obligation cannot be estimated reliably.

ROGERS SUGAR INC.

14

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(l) Financial instruments:

(i) IFRS 9, *Financial Instruments*:

The Company early adopted all the requirements of IFRS 9 (2014), *Financial Instruments* with a date of initial application of October 2, 2016. The standard establishes principles for the financial reporting classification and measurement of financial assets and financial liabilities. This standard incorporates a new hedging model, which increases the scope of hedged items eligible for hedge accounting and aligns hedge accounting more closely with risk management. This standard also amends the impairment model by introducing a new "expected credit loss" model for calculating impairment.

This new standard also increases required disclosures about an entity's risk management strategy, cash flows from hedging activities and the impact of hedge accounting on the consolidated financial statements.

IFRS 9 (2014) uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39, *Financial instruments - Recognition and Measurement*. The approach in IFRS 9 (2014) is based on how an entity manages its financial instruments and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward in IFRS 9 (2014).

The following summarizes the classification and measurement changes for the Company's non-derivative and derivative financial assets and financial liabilities as a result of the adoption of IFRS 9 (2014).

	IAS 39	IFRS 9 (2014)
Financial assets:		
Cash	Loans and receivables	Amortized cost
Restricted cash	Loans and receivables	Amortized cost
Trade and other receivables	Loans and receivables	Amortized cost
Income taxes recoverable	Loans and receivables	Amortized cost
Non-hedged derivative assets	Fair value through profit and loss	Fair value through profit or loss

ROGERS SUGAR INC.

15

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(l) Financial instruments (continued):

(i) IFRS 9, *Financial Instruments* (continued):

	IAS 39	IFRS 9 (2014)
Financial liabilities:		
Revolving credit facility	Other financial liabilities	Amortized cost
Trade and other payables	Other financial liabilities	Amortized cost
Income taxes payable	Other financial liabilities	Amortized cost
Finance lease obligations	Other financial liabilities	Amortized cost
Convertible unsecured subordinated debentures	Other financial liabilities	Amortized cost
Other long-term liabilities	Fair value through profit and loss	Fair value through profit or loss
Non-hedged derivative liabilities	Fair value through profit and loss	Fair value through profit or loss

With the adoption of IFRS 9 (2014), the Company's natural gas futures and interest rate swap agreements were designated as being effective hedging instruments.

In accordance with the transitional provisions of IFRS 9 (2014), the financial assets and financial liabilities held at October 2, 2016 were reclassified retrospectively without prior period restatement based on the new classification requirements and the characteristics of each financial instrument at October 2, 2016.

The accounting for these instruments and the line item in which they are included in the balance sheet were unaffected by the adoption of IFRS 9 (2014). The adoption of IFRS 9 (2014) did not result in any measurement adjustments to our financial assets and financial liabilities. Our significant accounting policies for financial instruments, derivative financial instruments, and hedging relationships have been aligned with IFRS 9 (2014). The adoption of IFRS 9 (2014) did not have a material impact on impairment at October 2, 2016.

The Company initially recognizes financial instruments on the trade date at which the Company becomes a party to the contractual provisions of the instrument. Financial instruments are initially measured at fair value. In the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability are added to or deducted from the fair value.

ROGERS SUGAR INC.

16

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(i) Financial instruments (continued):

(ii) Financial assets:

Financial assets are classified into the following categories:

a. Financial assets measured at amortized cost:

A financial asset is subsequently measured at amortized cost, using the effective interest method and net of any impairment loss, if:

- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principals and/or interest.

The Company currently classifies its cash, trade accounts receivable, and certain other current assets as assets measured at amortized cost. The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred.

The Company recognizes loss allowances for expected credit losses on financial assets measured at amortized cost. The Company has a portfolio of trade receivables at the reporting date.

The Company uses historical trends of the probability of default, the timing of recoveries and the amount of loss incurred, adjusted for management's judgement as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical trends.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognized in income or loss and reflected in an allowance account against trade and other receivables.

b. Financial assets measured at fair value:

These assets are measured at fair value and changes therein, including any interest are recognized in profit or loss. The Company currently has no significant financial assets measured at fair value, except for non-hedged derivative assets.

ROGERS SUGAR INC.

17

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(i) Financial instruments (continued):

(iii) Financial liabilities:

Financial liabilities are classified into the following categories:

a. Financial liabilities measured at amortized cost:

A financial liability is subsequently measured at amortized cost, using the effective interest method. The Company currently classifies and measures short-term borrowings, trade payables and accrued liabilities, finance lease obligations, and convertible unsecured subordinated debentures as financial liabilities measured at amortized cost.

b. Financial liabilities measured at fair value:

Financial liabilities at fair value are initially recognized at fair value and are re-measured at each reporting date with any changes therein recognized in net (loss) earnings. The Company currently has no significant financial liabilities measured at fair value except for other long-term liabilities and non-hedged derivative liabilities.

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled or expired.

Financial assets and liabilities are offset and the net amount is presented in the consolidated statements of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

(iv) Fair values of financial instruments:

Financial assets and liabilities measured at fair value use a fair value hierarchy to prioritize the inputs used in measuring fair value as follows:

Level 1 - valuation based on observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - valuation techniques based on inputs that are other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (prices) or indirectly (derived from prices); and

Level 3 - valuation techniques with observable market inputs (involves assumptions and estimates by management of how market participants would price the asset or liability).

ROGERS SUGAR INC.

18

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(i) Financial instruments (continued):

(iv) Fair values of financial instruments (continued):

a. Cash:

The Company classifies its cash as amortized cost assets. Cash includes cash on hand, bank balances and bank overdraft when the latter forms an integral part of the Company's cash management.

b. Derivative financial instruments and hedging relationships:

The Company enters into derivative financial instruments to hedge its market risk exposures. On initial designation of the hedge, the Company formally documents the relationship between the hedging instruments and hedged items, including the risk management objectives and strategy in undertaking the hedge transaction, together with the methods that will be used to assess the effectiveness of the hedging relationship. The Company makes an assessment, both at the inception of the hedge relationship as well as on an ongoing basis, whether the hedging instruments are expected to be effective in offsetting the changes in the fair value or cash flows of the respective hedged items throughout the period for which the hedge is designated. For a cash flow hedge of a forecasted transaction, the transaction should be highly probable to occur and should present an exposure to variations in cash flows that could ultimately affect reported net (loss) earnings.

c. Embedded derivatives:

Embedded derivatives are separated from the host contract and accounted for separately if the economic characteristics, risks of the host contract and the embedded derivative are not closely related; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the combined instrument is not measured at fair value through profit or loss as described in note 2(d)(i).

d. Other derivatives:

When a derivative financial instrument, for example, sugar futures and at times options ("sugar contracts"), foreign exchange forward contracts and embedded derivatives is not designated in a qualifying hedge relationship, all changes in its fair value are recognized immediately in net (loss) earnings (marked-to-market).

ROGERS SUGAR INC.

19

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(l) Financial instruments (continued):

(iv) Fair values of financial instruments (continued):

e. Compound financial instruments:

The Company's convertible unsecured subordinated debentures are accounted for as compound financial instruments. The liability component of a compound financial instrument is recognized initially at the fair value of a similar liability that does not have an equity conversion option. The equity component is recognized initially as the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortized cost using the effective interest method. The equity component of a compound financial instrument is not re-measured subsequent to initial recognition. Interest, dividends, gains and losses relating to the financial liability are recognized in profit or loss.

f. Financing charges:

Financing charges, which reflect the cost to obtain new financing, are offset against the debt for which they were incurred and recognized in finance costs using the effective interest method. Financing charges for the revolving credit facility are recorded with other assets.

g. Trade date:

The Company recognizes and derecognizes purchases and sales of derivative contracts on the trade date.

h. Share capital:

Common shares

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares are recognized as a deduction from equity, net of any tax effects. Dividends to the equity holders are recorded in equity.

Repurchase of share capital

When share capital recognized as equity is repurchased for cancellation, the amount of the consideration paid, which includes directly attributable costs, net of any tax effects, is recognized as a deduction from equity. The excess of the purchase price over the carrying amount of the shares is charged to deficit.

ROGERS SUGAR INC.

20

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

3. Significant accounting policies (continued):

(l) Financial instruments (continued):

(v) Cash flow hedges:

When a derivative is designated as the hedging instrument in a hedge of the variability in cash flows attributable to a particular risk associated with a recognized asset or liability or a highly probable forecasted transaction that could affect net (loss) earnings, the effective portion of changes in the fair value of the derivative is recognized in other comprehensive (loss) income and presented in accumulated other comprehensive (loss) income as part of equity.

The amount recognized in other comprehensive (loss) income is removed and included in net (loss) earnings under the same line item in the consolidated statements of (loss) earnings and comprehensive (loss) income as the hedged item, in the same period that the hedged cash flows affect net (loss) earnings.

If the hedging instrument no longer meets the criteria for hedge accounting, expires or is sold, terminated, or exercised, the hedge accounting is discontinued prospectively. The cumulative gain or loss previously recognized in other comprehensive (loss) income remains in accumulated other comprehensive (loss) income until the forecasted transaction affects profit or loss.

If the forecasted transaction is no longer expected to occur, then the balance in accumulated other comprehensive (loss) income is recognized immediately in net (loss) earnings.

When the hedged item is a non-financial asset, the amount recognized in other comprehensive (loss) income is transferred to net (loss) earnings in the same period that the hedged item affects net (loss) earnings.

The Company has designated as hedging items its natural gas futures and its interest rate swap agreements entered into in order to protect itself against natural gas prices and interest rate fluctuations as cash flow hedges.

3. Significant accounting policies (continued):

(m) Revenue recognition:

The Company derives revenue from the sale of finished goods, which include sugar and maple products. The Company recognizes revenue at a point in time when it transfers control of the finished goods to a customer, which occurs upon shipment of the finished goods from the Company's facilities or upon delivery of the finished goods to the customer's premises. Some arrangements for the sale of finished goods provide for customer price discounts and/or volume rebates based on aggregate sales over a specified period, which gives rise to variable consideration. At the time of sale, estimates are made for items giving rise to variable consideration based on the terms of the sales program or arrangement. The variable consideration is estimated at contract inception using the most likely amount method and revenue is only recognized to the extent that a significant reversal of revenue is not expected to occur. The estimate is based on historical experience, current trends, and other known factors. Sales are recorded net of customer discounts, rebates, and exclude sales taxes.

(n) Lease payments:

Payments made under operating leases are recognized in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognized as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liabilities. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

(o) Finance income and finance costs:

Finance income comprises interest income on funds invested and finance costs comprise interest expense on borrowings. Changes in the fair value of interest rate swaps are recorded initially in other comprehensive income since inception of the cash flow hedge and transferred to finance income and finance costs in the same period that the hedged cash flows affect net (loss) earnings. Interest expense is recorded using the effective interest method.

(p) Income taxes:

Income tax expense comprises current and deferred taxes. Current tax and deferred tax are recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive (loss) income.

Current tax is the expected tax payable or recoverable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to taxes payable in respect of previous years.

3. Significant accounting policies (continued):

(p) Income taxes (continued):

Deferred taxes are recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred taxes are not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred taxes are not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred taxes are measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. In addition, the effect on deferred tax assets or liabilities of a change in tax rates is recognized in profit or loss in the period in which the enactment or substantive enactment takes place, except to the extent that it relates to an item recognized either in other comprehensive (loss) income or directly in equity in the current or in a previous period. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

(q) (Loss) Earnings per share:

The Company presents basic and diluted (loss) earnings per share ("EPS") data for its common shares. Basic EPS is calculated by dividing the profit or loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to common shareholders and the weighted average number of common shares outstanding, for the effects of all dilutive potential common shares from the conversion of the convertible debentures.

3. Significant accounting policies (continued):

(r) New standards and interpretations adopted:

(i) IFRS 2, Classification and Measurement of Share-based Payment Transactions:

On June 20, 2016, the IASB issued amendments to IFRS 2, *Share-based Payment*, clarifying how to account for certain types of share-based payment transactions. The amendments apply for annual periods beginning on or after January 1, 2018. As a practical simplification, the amendments can be applied prospectively. Retrospective or early application is permitted if information is available without the use of hindsight.

The amendments provide requirements on the accounting for:

- The effects of vesting and non-vesting conditions on the measurement of cash-settled share-based payments;
- Share-based payment transactions with a net settlement feature for withholding tax obligations; and
- A modification to the terms and conditions of a share-based payment that changes the classification of the transaction from cash-settled to equity-settled.

The Company adopted the amendments to IFRS 2 in its consolidated financial statements for the annual period beginning on September 30, 2018. The adoption of the amendments did not have an impact on the consolidated financial statements.

(ii) IFRS 15, Revenue from Contracts with Customers:

On May 28, 2014 the IASB issued IFRS 15, Revenue from Contracts with Customers. IFRS 15 will replace IAS 11, *Construction Contracts*, IAS 18, *Revenue*, IFRIC 13, *Customer Loyalty Programmes*, IFRIC 15, *Agreements for the Construction of Real Estate*, IFRIC 18, *Transfer of Assets from Customers*, and SIC 31, *Revenue - Barter Transactions Involving Advertising Services*. The new standard is effective for years beginning on or after January 1, 2018. Earlier application is permitted.

The standard contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized.

The new standard applies to contracts with customers. It does not apply to insurance contracts, financial instruments or lease contracts, which fall in the scope of other IFRSs.

The Company adopted IFRS 15 in its consolidated financial statements for the year beginning on September 30, 2018. The adoption of the standard did not have an impact on the consolidated financial statements.

3. Significant accounting policies (continued):

(r) New standards and interpretations adopted (continued):

(iii) IFRIC 22, Foreign Currency Transactions and Advance Consideration:

On December 8, 2016, the IASB issued IFRIC Interpretation 22, *Foreign Currency Transactions and Advance Consideration*.

The Interpretation clarifies that the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration.

The Interpretation is applicable for annual periods beginning on or after January 1, 2018. Earlier application is permitted.

The Company adopted the Interpretation in its consolidated interim financial statements for the annual period beginning on September 30, 2018. The adoption of the Interpretation did not have an impact on the consolidated financial statements.

(iv) Annual Improvements to IFRS Standards (2014-2016) Cycle:

On December 8, 2016 the IASB issued narrow-scope amendments to three standards as part of its annual improvements process. Each of the amendments has its own specific transition requirements and effective date.

Amendments were made to the following standard:

- Removal of out-dated exemptions for first-time adopters under IFRS 1, *First-time Adoption of International Financial Reporting Standards*, effective for annual periods beginning on or after January 1, 2018; and
- Clarification that the election to measure an associate or joint venture at fair value under IAS 28, *Investments in Associates and Joint Ventures* for investments held directly, or indirectly, through a venture capital or other qualifying entity can be made on an investment-by-investment basis. The amendments are effective retrospectively for annual periods beginning on or after January 1, 2018.

The Company adopted these amendments in its consolidated interim financial statements for the annual period beginning September 30, 2018. The adoption of the amendments did not have an impact on the consolidated financial statements.

3. Significant accounting policies (continued):

(s) New standards and interpretations not yet adopted:

A number of new standards and amendments to standards and interpretations are not yet effective for the year ending September 28, 2019 and have not been applied in preparing these consolidated financial statements. New standards and amendments to standards and interpretations that are currently under review include:

(i) IFRS 16, *Leases*:

On January 13, 2016 the IASB issued IFRS 16 *Leases*. The new standard is effective for annual periods beginning on or after January 1, 2019. Earlier application is permitted for entities that apply IFRS 15 *Revenue from Contracts with Customers* at or before the date of initial adoption of IFRS 16. IFRS 16 will replace IAS 17 *Leases*.

This standard introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments.

This standard substantially carries forward the lessor accounting requirements of IAS 17, while requiring enhanced disclosures to be provided by the lessors. Other areas of the lease accounting model have been impacted, including the definition of a lease. Transitional provisions have been provided.

The Company intends to adopt IFRS 16 in its consolidated financial statements for the annual period beginning on September 29, 2019.

The adoption of IFRS 16 will have a significant impact on the Company's consolidated financial statements, as the Company will recognize new assets and liabilities for its operating leases of warehouses, operating properties, railcars and production equipment. In addition, the nature and timing of expenses related to those leases will change as IFRS 16 replaces the straight-line operating lease expense with a depreciation charge for right-of use assets and interest expense on lease liabilities. On a go-forward basis, there will be a decrease in operating lease expense and an increase in depreciation and amortization and interest expense.

3. Significant accounting policies (continued):

(s) New standards and interpretations not yet adopted (continued):

(i) IFRS 16, *Leases* (continued):

The Company intends to adopt this standard using the modified retrospective approach measuring the right-of-use asset to be equal to the lease liability with no restatement of the comparative period. Under the modified retrospective approach, the Company has elected to use the following practical expedients permitted on adoption of IFRS 16:

- the Company will not reassess whether a contract is, or contains, a lease at the date of initial application and instead will apply IFRS 16 to contracts that were previously identified as leases applying IAS 17, *Leases*;
- the Company will rely on the assessment of the onerous lease provisions under IAS 37, *Provisions*, contingent liabilities and contingent assets, instead of performing an impairment review. The Company will adjust the right-of-use assets at the date of initial application by the amount of any provision for onerous leases recognized in the consolidated balance sheet immediately before the date of initial application;
- the Company will account for leases for which the lease term ends within twelve months of September 28, 2019 as short-term leases; and
- the Company will use hindsight in determining the lease term at the date of initial application.

The Company's preliminary assessment of the impact of the adoption of the standard is an increase of the lease liability of approximately \$11.0 million and an increase in the right-of-use asset of approximately \$11.0 million on the consolidated statement of financial position as at September 29 2019. As amounts previously recognized as lease expenses will be replaced by the depreciation of the right-of-use asset and the lease liability finance costs, the consolidated statement of (loss) earnings and comprehensive (loss) income will be affected.

(ii) IFRIC 23, *Uncertainty over Income Tax Treatments*:

On June 7, 2017, the IASB issued IFRIC Interpretation 23, *Uncertainty over Income Tax Treatments*.

The Interpretation provides guidance on the accounting for current and deferred tax liabilities and assets in circumstances in which there is uncertainty over income tax treatments.

The Interpretation is applicable for annual periods beginning on or after January 1, 2019. Earlier application is permitted.

3. Significant accounting policies (continued):

(s) New standards and interpretations not yet adopted (continued):

(ii) IFRIC 23, Uncertainty over Income Tax Treatments (continued):

The Interpretation requires an entity to:

- Contemplate whether uncertain tax treatments should be considered separately, or together as a group, based on which approach provides better predictions of the resolution;
- Reflect an uncertainty in the amount of income tax payable (recoverable) if it is probable that it will pay (or recover) an amount for the uncertainty; and
- Measure a tax uncertainty based on the most likely amount or expected value depending on whichever method better predicts the amount payable (recoverable).

The Company intends to adopt the Interpretation in its consolidated financial statements for the annual period beginning on September 29, 2019. The Company does not expect the amendments to have a material impact on the consolidated financial statements.

(iii) Annual Improvements to IFRS Standards (2015-2017) Cycle:

On December 12, 2017 the IASB issued narrow-scope amendments to three standards as part of its annual improvements process.

The amendments are effective on or after January 1, 2019, with early application permitted. Each of the amendments has its own specific transition requirements.

Amendments were made to the following standards:

- IFRS 3, *Business Combinations* and IFRS 11, *Joint Arrangements* – to clarify how a company accounts for increasing its interest in a joint operation that meets the definition of a business;
- IAS 12, *Income Taxes* – to clarify that all income tax consequences of dividends are recognized consistently with the transactions that generated the distributable profits - in profit or loss, OCI, or equity; and
- IAS 23, *Borrowing Costs* – to clarify that specific borrowings – i.e. funds borrowed specifically to finance the construction of a qualifying asset – should be transferred to the general borrowings pool once the construction of the qualifying asset has been completed.

The Company intends to adopt these amendments in its consolidated financial statements for the annual period beginning on September 29, 2019. The Company does not expect the amendments to have a material impact on the consolidated financial statements.

3. Significant accounting policies (continued):

(s) New standards and interpretations not yet adopted (continued):

(iv) Amendments to References to the Conceptual Framework in IFRS Standards:

On March 29, 2018 the IASB issued a revised version of its *Conceptual Framework for Financial Reporting* (the Framework), that underpins IFRS Standards. The IASB also issued *Amendments to References to the Conceptual Framework in IFRS Standards* (the Amendments) to update references in IFRS Standards to previous versions of the Conceptual Framework.

Both documents are effective from January 1, 2020 with earlier application permitted.

The Company does not intend to adopt the Amendments in its consolidated financial statements before the annual period beginning on October 4, 2020. The Company does not expect the amendments to have a material impact on the consolidated financial statements.

4. Business combinations:

On November 18, 2017, the Company acquired all of the issued and outstanding shares of Decacer for a total consideration of \$43.0 million (\$42.1 million net of cash acquired) (the "Decacer Transaction"). The Company financed the acquisition, including transaction costs, with a draw-down on the Company's \$265.0 million amended credit facility (see Note 17, Revolving credit facility).

Decacer is a major bottler and distributor of branded and private label maple syrup and maple sugar based in Dégelis, Québec.

The Company has determined the fair value of the assets acquired and liabilities assumed based on management's preliminary best estimate of their fair values and taking into account all relevant information available at that time. The Company had completed the purchase price allocation over the identifiable net assets and goodwill and no adjustment was made to the purchase price allocation as presented in the audited annual consolidated financial statements for the fiscal year ended September 29, 2018.

ROGERS SUGAR INC.

29

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

4. Business combinations (continued):

The following table presents the purchase price allocation:

Identifiable assets and liabilities assumed:	2018
	\$
Cash	928
Trade and other receivables	3,832
Inventories	15,711
Prepaid expenses	96
Property, plant and equipment	8,132
Intangible assets	11,307
Trade and other payables	(8,311)
Income taxes payable	(197)
Deferred tax liabilities	(4,544)
Total net assets acquired	26,954
Total consideration transferred	43,012
Goodwill (Note 16)	16,058
	\$
Revolving credit facility	43,012
Total consideration transferred	43,012

The trade receivables comprise a gross amount of \$3.8 million for which the full amount was expected to be collectable subsequent to the acquisition date.

Goodwill is attributable primarily to expected synergies and assembled workforce, which were not recorded separately since they did not meet the recognition criteria for identifiable intangible assets. Goodwill and intangible assets recorded in connection with this acquisition are not deductible for tax purposes.

The operating results of Decacer are included in the maple products segment. If the acquisition had occurred on October 1, 2017, the consolidated results of the Company for fiscal 2018 would have included additional net sales of approximately \$11.7 million and additional results from operating activities of approximately \$0.3 million, based on management's best estimates. In determining these estimated amounts, management assumed that the fair value adjustments that arose on the date of acquisition would have been the same if the acquisition had occurred on October 1, 2017.

Acquisition-related costs of \$0.7 million for legal fees, due diligence costs and other fees have been expensed in relation to the above business combination. These costs have been recorded in administration and selling expenses in the consolidated statements of (loss) earnings and comprehensive (loss) income.

ROGERS SUGAR INC.

30

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

5. Depreciation and amortization expenses:

Depreciation and amortization expenses were charged to the consolidated statements of (loss) earnings and comprehensive (loss) income as follows:

	For the fiscal years ended	
	September 28, 2019	September 29, 2018
	\$	\$
Depreciation of property, plant and equipment:		
Cost of sales	14,927	14,292
Administration and selling expenses	522	424
	15,449	14,716
Amortization of intangible assets:		
Administration and selling expenses	3,772	3,758
Total depreciation and amortization expenses	19,221	18,474

6. Finance income and finance costs:

Recognized in net (loss) earnings:

	For the fiscal years ended	
	September 28, 2019	September 29, 2018
	\$	\$
Net change in fair value of interest rate swaps (note 11)	378	532
Finance income	378	532
Interest expense on convertible unsecured subordinated debentures, including accretion of \$821 (2018 - \$785) (note 23)	8,339	7,691
Interest on revolving credit facility	7,337	6,893
Amortization of deferred financing fees	1,178	1,422
Other interest expense	1,637	1,658
Finance costs	18,491	17,664
Net finance costs recognized in net (loss) earnings	18,113	17,132

ROGERS SUGAR INC.

31

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

7. Income tax expense (recovery):

	For the fiscal years ended	
	September 28, 2019	September 29, 2018
	\$	\$
Current tax expense:		
Current period	16,084	17,967
Deferred tax (recovery) expense:		
Recognition and reversal of temporary differences	(978)	375
Adjustments for prior year periods	(453)	-
Changes in tax rates	(452)	(103)
Deferred tax (recovery) expense	(1,883)	272
Total income tax expense	14,201	18,239

Income tax recognized in other comprehensive (loss) income:

	For the fiscal years ended					
	September 28, 2019			September 29, 2018		
	Before tax	Tax effect	Net of tax	Before tax	Tax effect	Net of tax
	\$	\$	\$	\$	\$	\$
Cash flow hedges	(4,763)	1,243	(3,520)	(32)	9	(23)
Defined benefit actuarial (losses) gains	(19,902)	5,194	(14,708)	6,643	(1,763)	4,880

Reconciliation of effective tax rate:

The provision for income taxes differs from the amount computed by applying the Canadian federal and provincial tax rates to earnings before provision for income taxes. The reasons for the difference and the related tax effects are as follows:

	For the fiscal years ended			
	September 28, 2019		September 29, 2018	
Earnings before income taxes	%	\$	%	\$
	-	6,034	-	66,968
Income taxes using the Company's statutory tax rate	27.00	1,629	26.75	17,914
Changes due to the following items:				
Changes in tax rates	(7.49)	(452)	(0.15)	(103)
Non-deductible expenses	2.59	156	0.23	156
Non-deductible impairment of goodwill	220.76	13,321	-	-
Adjustments for prior year periods	(7.51)	(453)	-	-
Other	-	-	0.41	272
	235.35	14,201	27.24	18,239

ROGERS SUGAR INC.

32

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

8. Restricted cash:

Restricted cash represents balances assumed by the Company as a result of having acquired all of the issued and outstanding shares of TMTC. On December 1, 2016, TMTC acquired all issued and outstanding Class A shares of Great Northern with \$7.0 million cash consideration (which was placed in escrow), conditionally payable in quarterly installments contingent on achieving monthly and annual sales volume targets to a specific client for the twelve-month periods ending November 30, 2017 and November 30, 2018. The fair value of the contingent consideration was determined to be \$6.6 million and was calculated using a probability-weighted expectation of the payment of the contingent consideration and a discount rate of 3.45% as at the acquisition date. As at September 28, 2019, cash held in an escrow account was nil (September 29, 2018 - \$0.8 million) and the fair value of the contingent consideration payable was nil (September 29, 2018 - \$0.8 million) (See Note 19, Other long-term liabilities).

9. Trade and other receivables:

	September 28, 2019	September 29, 2018
Trade receivables	\$ 80,174	\$ 73,794
Less expected credit loss	(827)	(373)
	79,347	73,421
Other receivables	5,961	5,505
Initial margin deposits with commodity brokers	515	2,810
	85,823	81,736

The Company grants credit to its customers in the ordinary course of business.

Management believes that the Company's exposure to credit risk and impairment losses related to trade and other receivables is limited due to the following reasons:

- There is a broad base of customers with dispersion across different market segments.
- Bad debt write-offs to total revenue have been less than 0.1% for each of the last five years (averaging less than \$0.1 million per year). Write-offs for fiscal 2019 were \$0.1 million (September 29, 2018 - \$0.2 million). All bad debt write-offs are charged to administration and selling expenses.
- Less than 2% of trade receivables are outstanding for more than 90 days, which is comparable to September 29, 2018, while over 83% are current (less than 30 days) as at September 28, 2019 (September 29, 2018 - 79%).

Through general security agreements with its lenders, trade and other receivables have been granted as continuing collateral security for all present and future indebtedness to the current lenders.

ROGERS SUGAR INC.

33

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

10. Inventories:

	September 28, 2019	September 29, 2018
	\$	\$
Raw inventory	113,487	113,134
Work in progress	7,947	10,460
Finished goods	36,356	32,491
	157,790	156,085
Packaging and operating supplies	11,831	11,074
Spare parts and other	12,738	12,166
	182,359	179,325

Costs of sales expensed during the year were all inventorial items, except for fixed costs incurred in Taber, Alberta, after the beet slicing campaign, and mark-to-market adjustments of derivative financial instruments.

As at September 28, 2019, inventories recognized as cost of goods sold amounted to \$677.7 million (September 29, 2018 - \$669.9 million).

As at September 28, 2019, the Company recorded an amount of \$0.1 million (September 29, 2018 - nil) related to onerous contracts as defined in IAS 37 paragraph 66, as a write-down to inventory through cost of sales. In the normal course of business, the Company enters into an economic hedge for all of its raw sugar purchases and refined sugar sales. As the Company does not apply hedge accounting for these contracts, the related derivative instruments, being the futures contracts are marked-to-market. As a result, the Company must record an onerous loss to cost of sales when the net realizable value is lower than the mark-to-market of the raw sugar futures contract and the related refining costs.

11. Financial instruments:

Derivative financial instruments

Fair value estimates are made as of a specific point in time, using available information about the financial instruments. These estimates are subjective in nature and may not be determined with precision. A three-tier fair value hierarchy prioritizes the inputs used in measuring the fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

11. Financial instruments (continued):

Derivative financial instruments (continued)

The fair value of derivative instruments is the estimated amount that the Company would receive or pay to terminate the instruments at the reporting date. The fair values have been determined by reference to prices available from the markets on which the instruments trade, subject to credit adjustments as applicable. The fair values of the sugar future contracts and options are measured using Level 1 inputs, using published quoted values for these commodities. The fair values for the natural gas futures contracts, foreign exchange forward contracts and interest rate swap contracts are measured using Level 2 inputs. The fair values for these derivative assets or liabilities are estimated using industry standard valuation models.

Where applicable, these models project future cash flows and discount the future amounts to a present value using market-based observable inputs including interest rate curves, credit spreads, natural gas prices, foreign exchange rates, and forward and spot prices for currencies.

The fair values of all derivative instruments approximate their carrying value and are recorded as separate line items on the consolidated statements of financial position.

As at October 2, 2016, the Company's natural gas futures and interest rate swap agreements were designated as cash flow hedges and qualified for hedge accounting.

Details of recorded gains (losses) for the year, in marking-to-market all derivative financial instruments and embedded derivatives that are outstanding at year-end, are noted below. For sugar futures contracts (derivative financial instruments), the amounts noted below are netted with the variation margins paid or received to/from brokers at the end of the reporting period. Natural gas forwards and sugar futures have been marked-to-market using published quoted values for these commodities, while foreign exchange forward contracts have been marked-to-market using rates published by the financial institution, which is a counterparty to these contracts. The fair values of the interest rate swaps have been determined by using rates published on financial capital markets.

The fair value of natural gas futures contracts, foreign exchange forward contracts and interest rate swap calculations includes a credit risk adjustment for the Company's or counterparty's credit, as appropriate.

Ending OCI – net of income taxes	(2,547)	(701)	3,248	(1,967)	2,239	272

For the fiscal year ended September 28, 2019, the derivatives designated as cash flow hedges were considered to be fully effective and no ineffectiveness has been recognized in net (loss) earnings.

Approximately \$0.1 million of net losses presented in accumulated other comprehensive (loss) income are expected to be reclassified to net (loss) earnings within the next twelve months.

For its financial assets and liabilities measured at amortized cost as at September 28, 2019 and September 29, 2018, the Company has determined that the carrying value of its short-term financial assets and liabilities approximates their fair value because of the relatively short period to maturity of these instruments.

The Company uses derivative financial instruments to manage its exposure to changes in raw sugar, foreign exchange, and natural gas prices. In addition, the Company entered into interest rate swap contracts to fix a portion of the Company's exposure to floating interest rate debt on its short-term borrowings. The Company's objective for holding derivatives is to minimize risk using the most efficient methods to eliminate or reduce the impacts of these exposures.

(a) Raw sugar:

The Company's risk management policy is to manage the forward pricing of purchases of raw sugar in relation to its forward refined sugar sales to reduce price risk. The Company attempts to meet this objective by entering into futures contracts to reduce its exposure. Such financial instruments are used to manage the Company's exposure to variability in fair value attributable to the committed purchase price of raw sugar. The pricing mechanisms of futures contracts and the respective forecasted raw sugar purchase transactions are the same.

Net (liability) asset (CA\$)			(32)			229

All sugar futures contracts are traded through a large exchange clearing house on the New York Intercontinental Exchange. Regulation of the U.S. futures industry is primarily self-regulation, with the role of the Federal Commodity Futures Trading Commission being principally an oversight role to determine that self-regulation is continuous and effective.

The exchange clearing house used is one of the world's largest capitalized financial institutions with excellent long-term credit ratings. Daily cash settlements are mandatory (margin calls) for resulting gains and/or losses from futures trading for each customer's account. Due to the above, the Company does not anticipate a credit risk from the raw sugar futures derivative instruments.

(b) Natural gas:

The Company uses natural gas contracts to help manage its costs of natural gas. The Company monitors its positions and the credit ratings of its counterparties and does not anticipate losses due to counterparty's non-performance. The Company's natural gas contracts as well as the fair value of these contracts relating to purchases of natural gas are as follows:

Foreign exchange rate at the end of period			1.3247			1.2918
Net liability (CA\$)			(3,558)			(4,432)

The forecasted purchases of natural gas, the hedged items, are used for calculating the hedge ineffectiveness. No ineffectiveness was recognized in net (loss) earnings as the change in value of the hedging instrument for calculating ineffectiveness was the same or smaller as the change in value of the hedged items used for calculating the ineffectiveness.

(c) Foreign exchange contracts:

The Company's activities, which result in exposure to fluctuations in foreign currency exchange rates, consist of the purchasing of raw sugar, the selling of refined sugar and maple products, the purchase of natural gas and purchases of property, plant and equipment. The Company manages this exposure by creating offsetting positions through the use of financial instruments. These instruments include forward contracts, which are commitments to buy or sell U.S. dollars or euros at a future date, and may be settled in cash.

The credit risk associated with foreign exchange contracts arises from the possibility that a counterparty to a foreign exchange contract, in which the Company has an unrealized gain, fails to perform according to the terms of the contract. The credit risk is much less than the notional principal amount, being limited at any time to the change in foreign exchange rates attributable to the principal amount.

Forward foreign exchange contracts have maturities of less than four years and relate mostly to U.S. currency, and from time to time, euro currency. The counterparties to these contracts are major Canadian financial institutions. The Company does not anticipate any material adverse effect on its financial position resulting from its involvement in these types of contracts, nor does it anticipate non-performance by the counterparties.

(d) Interest rate swap agreements:

In order to fix the interest rate on a substantial portion of the expected drawdown of the revolving credit facility, the Company enters into interest rate swap agreements. The outstanding swap agreements by maturity are as follows:

ROGERS SUGAR INC.

42

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

11. Financial instruments (continued):

Derivative financial instruments (continued)

(d) Interest rate swap agreements (continued):

Fiscal year contracted	Date	Total value \$
Fiscal 2015	June 28, 2018 to June 28, 2020 – 1.959%	30,000
Fiscal 2017	May 29, 2017 to June 28, 2022 – 1.454%	20,000
Fiscal 2017	September 1, 2017 to June 28, 2022 – 1.946%	30,000
Fiscal 2017	June 29, 2020 to June 29, 2022 – 1.733%	30,000
Fiscal 2019	March 12, 2019 to June 28, 2024 – 2.08%	20,000
Fiscal 2019	June 28, 2022 to June 28, 2024 – 2.17%	80,000

The counterparties to these swap agreements are major Canadian financial institutions. The Company does not anticipate any material adverse effect on its financial position resulting from its involvement in these types of swap agreements, nor does it anticipate non-performance by the counterparties. As at September 28, 2019, the fair value of the swap agreements amounted to a liability of \$1.1 million (September 29, 2018 - asset of \$2.5 million).

The forecasted interest payments, the hedged items, are used for calculating the hedge ineffectiveness. No ineffectiveness was recognized in net (loss) earnings as the change in value of the hedging instrument for calculating ineffectiveness was the same or smaller as the change in value of the hedged items used for calculating the ineffectiveness.

Risks

The Company, through its financial assets and liabilities, is exposed to various risks. The following analysis provides a measurement of risks at year-end.

(a) Credit risk:

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligation. The Company believes it has limited credit risk other than those explained in Note 9, Trade and other receivables and Note 11, Financial instruments.

ROGERS SUGAR INC.

43

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

11. Financial instruments (continued):

Risks (continued)

(b) Currency risk:

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the foreign exchange rate. The Company's significant cash flow exposure to foreign currency is due mainly to the following:

- sales in U.S. dollars for both the sugar and maple products segments;
- purchases of natural gas;
- sales of by-products;
- Taber refined sugar and by-products sales;
- ocean freight; and
- purchases of property, plant and equipment for both the sugar and maple products segments.

The Company mitigates its exposure to foreign currency by entering into forward exchange contracts (see Note 11, Financial instruments; Derivative financial instruments, (c) Foreign exchange contracts).

The Company had the following significant foreign currency exposures at year-end:

	September 28, 2019 (US\$)	September 29, 2018 (US\$)
Financial instruments measured at amortized cost:		
Cash	2,115	1,672
Trade and other receivables, including initial margin deposits	21,330	21,440
Trade and other payables	(3,356)	(3,560)
	20,089	19,552
Financial instruments at fair value through profit or loss:		
Raw sugar futures sales contracts	92,765	157,035
Raw sugar futures purchases contracts	(95,200)	(156,754)
Natural gas contracts	(28,582)	(30,135)
Fair value loss or (gain) on futures contracts	(1,101)	362
	(32,118)	(29,492)
Total exposure from above	(12,029)	(9,940)
Forward exchange contracts	(64,333)	(47,675)
Gross exposure	(76,362)	(57,615)

ROGERS SUGAR INC.

44

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

11. Financial instruments (continued):

Risks (continued)

(b) Currency risk (continued):

As at September 28, 2019, the U.S./Can. exchange rate was \$1.3247 (September 29, 2018 - \$1.2918).

Based on the above gross exposure at year-end, and assuming that all other variables remain constant, in particular the price of raw sugar and natural gas, a 5-cent increase in the Canadian dollar would result in an decrease in net loss of \$2.8 million, (September 29, 2018 - increase in net earnings of \$2.1 million) while a 5-cent decrease would have an equal but opposite effect on net (loss) earnings.

Management believes that the impact on the gross exposure is not representative as it needs to be adjusted for the following transactions, which are not recorded on the consolidated statements of financial position as at year-end but were committed during the fiscal year, and will be accounted for as the physical transactions occur:

	September 28, 2019	September 29, 2018
	(US\$)	(US\$)
Gross exposure as per above	(76,362)	(57,615)
Sugar purchases priced not received	(85,992)	(93,516)
Committed future sales in U.S. dollars	139,368	111,698
Ocean freight	(488)	(15)
Other	(374)	(592)
Net exposure	(23,848)	(40,040)

The net exposure is due mainly to the Company's policy not to hedge its foreign exchange exposure on natural gas futures contracts with maturities exceeding 12 months. The impact of a 5-cent increase in the Canadian dollar would result in an decrease of net loss by \$0.9 million in 2019 (September 29, 2018 - increase in net earnings of \$1.5 million) while a decrease would have an equal but opposite effect on net (loss) earnings.

Raw sugar futures sales contracts represent, in large part, futures contracts entered into when sugar is priced by a raw sugar supplier. As both the raw sugar futures sales contracts and the sugar purchases priced not received are in U.S. dollars, there is no need to economically hedge the currency, hence the reason for the adjustment for sugar purchases priced not received.

ROGERS SUGAR INC.

45

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

11. Financial instruments (continued):

Risks (continued)

(b) Currency risk (continued):

Included in other is the Taber sales formula for refined sugar, which is based on the raw sugar value that trades in U.S. dollars. As all beet sugar is paid in Canadian dollars, the raw sugar value within the Taber sales contracts is in U.S. dollars and therefore needs to be economically hedged for currency exposure.

Some sales are transacted in U.S. dollars. For these sales, the raw sugar value is not hedged, as the corresponding futures contract is also in U.S. dollars. Only the U.S. dollar refined sugar margin and ocean freight contribution are economically hedged for the currency exposure.

Ocean freight for raw sugar is denominated in U.S. dollars and therefore forward exchange contracts are used to cover the foreign exchange exposure.

(c) Interest rate risk:

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

As at September 28, 2019, the Company has a short-term cash borrowing of \$17.0 million (September 29, 2018 - \$12.0 million) and a long-term cash borrowing of \$160.0 million (September 29, 2018 - \$160.0 million). The Company normally enters into a 30 - or 90-day bankers' acceptance for an amount varying between \$100.0 million to \$180.0 million of the borrowings, and will borrow either under prime rate loans or shorter term bankers' acceptances for any other borrowings.

To mitigate the risk in future cash flows due to interest rate fluctuations, the Company enters into interest rate swap agreements from time to time (see Note 11, Financial Instruments, Derivative financial instruments, (d) interest rate swap agreements). All other borrowings over and above the aggregate notional amount of the swap agreements are therefore exposed to interest rate fluctuations.

For the fiscal year ended September 28, 2019, if interest rates had been 50 basis points higher, considering all borrowings not covered by the interest rate swap agreements, net loss would have been \$0.5 million higher (September 29, 2018 - \$0.5 million lower net earnings) while a decrease would have an equal but opposite effect on net (loss) earnings.

ROGERS SUGAR INC.

(i) Based on notional amounts as presented above.

The convertible unsecured subordinated debentures of \$155.3 million have been excluded from the above due to the Company's option to satisfy the obligations at redemption or maturity in shares.

The Company borrows under its revolving credit facility (see Note 17, Revolving credit facility). It is the Company's intention to keep a debt level under its revolving credit facility between \$100.0 million to \$180.0 million. All other non-derivative financial liabilities are expected to be financed through the collection of trade and other receivables and cash flows generated from operations.

11. Financial instruments (continued):

Risks (continued)

(d) Liquidity risk (continued):

Derivative financial instruments for raw sugar, natural gas and forward exchange contracts are expected to be financed from the working capital of the Company.

As at September 28, 2019, the Company had an unused available line of credit of \$88.0 million (September 29, 2018 - \$93.0 million), a cash balance of \$0.3 million (September 29, 2018 - \$2.1 million) and an overdraft balance of \$8.3 million (September 29, 2018 - \$5.5 million).

(e) Commodity price risk:

Commodity price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in commodity prices.

There are two types of commodity contracts, which are entered into by the Company:

(i) Sugar:

In order to protect itself against fluctuations of the world raw sugar market, the Company follows a rigorous hedging program for all purchases of raw cane sugar and sales of refined sugar. Anytime raw sugar is priced by a sugar supplier, a corresponding sugar futures contract is sold for the same quantity, period and underlying value. Anytime refined sugar is priced by a customer, the corresponding volume of raw sugar is purchased for the same quantity, period and underlying value. The Company's policy is to cover all raw cane purchases and refined sugar sales as they are priced by the Company's suppliers and customers. On a daily basis, the Company monitors all net sugar futures contract positions against the physical priced purchases and sales commitments to ensure that appropriate hedge positions are in place.

For the Company's beet operation, the Board of Directors approved an economic pre-hedge, using sugar futures contracts, of some of the beet sugar sales that will occur in the future, provided there is a contract in place with the Alberta Sugar Beet Growers to grow sugar beets.

The Board of Directors also approved a trading book up to a maximum of 25,000 metric tonnes of sugar derivative contracts. The Board reviews on a quarterly basis the results achieved.

(ii) Natural gas:

In order to mitigate the overall price risks in the purchase of natural gas for use in the manufacturing operations, the Board approved the use of natural gas futures contracts. Natural gas futures contracts cannot be entered into for speculative reasons. The Board reviews on a quarterly basis the position of the natural gas contracts.

ROGERS SUGAR INC.

11. Financial instruments (continued):

Risks (continued)

(e) Commodity price risk (continued):

(ii) Natural gas (continued):

As at September 28, 2019, the Company had the following commodity contracts:

	Sugar futures contracts			Natural gas contracts		
	Volume M.T.	Current average value (US\$)	Current contract value (US\$)	Contracts (10,000 MM BTU)	Current average value (US\$)	Current contract value (US\$)
Purchases	333,725	\$ 282.92	\$ 94,419	1,127	\$ 22.98	\$ 25,896
Sales	(320,872)	283.24	(90,883)	–	–	–
	12,853	\$ n/a	\$ 3,536	1,127	\$ 22.98	\$ 25,896
Foreign exchange rate at the end of the period			1.3247	1.3247		
Net value CA\$			\$ 4,684	\$ 34,304		

As at September 29, 2018, the Company had the following commodity contracts:

	Sugar futures contracts			Natural gas contracts		
	Volume M.T.	Current average value (US\$)	Current contract value (US\$)	Contracts (10,000 MM BTU)	Current average value (US\$)	Current contract value (US\$)
Purchases	542,119	\$ 252.49	\$ 136,880	1,090	\$ 24.50	\$ 26,704
Sales	(541,154)	254.13	(137,523)	–	–	–
	965	\$ n/a	\$ (643)	1,090	\$ 24.50	\$ 26,704
Foreign exchange rate at the end of the period			1.2918	1.2918		
Net value CA\$			\$ (831)	\$ 34,496		

If, on September 28, 2019, the raw sugar value would have increased by US\$0.05 per pound (being approximately US\$110.0 per metric tonne), and all other variables remained constant, the impact on net loss would have been a decrease of approximately \$1.4 million (calculated only on the point-in-time exposure on September 28, 2019) (September 29, 2018 - increase in net earnings of \$0.1 million for US\$0.05 per pound increase). If the raw sugar value would have decreased by US\$0.02 per pound (being approximately US\$44.00 per metric tonne), and all other variables remained constant, the impact on net loss would have been an increase of approximately \$0.5 million (September 29, 2018 - decrease in net earnings of \$0.1 million for US\$0.02 decrease).

11. Financial instruments (continued):

Risks (continued)

(e) Commodity price risk (continued):

Except for the beet pre-hedge, management believes that the above is not representative, as the Company has physical raw sugar purchases and refined sugar selling contracts that would offset most gains or losses realized from such decrease or increase in the commodity value, when such contracts are liquidated. The Company had no beet pre-hedge contracts as at September 28, 2019 nor September 29, 2018. If, on September 28, 2019, the natural gas market price would have increased by US\$1.00, and all other variables remained constant, net loss would have decreased by \$11.0 million (September 29, 2018 - increase in net earnings of \$10.4 million) as a result of the change in fair value of our natural gas futures. If the natural gas value would have decreased by US\$1.00, and all other variables remained constant, net loss would have increased by \$11.0 million (September 29, 2018 - decrease in net earnings of \$10.4 million).

Management believes that this impact for natural gas is not representative as this variance will mostly offset when the actual natural gas is purchased and used. At such time, a gain or loss on the liquidation of the natural gas contracts would mostly offset the same increase or decrease in the actual physical transaction.

Fair values of financial instruments

The fair values of derivative instruments are the estimated amount that the Company would receive or pay to terminate the instruments at the reporting date. The fair values have been determined by reference to prices available from the markets on which the instruments trade, subject to credit adjustments as applicable. The fair values of all derivative instruments approximate their carrying value and are recorded as separate line items on the consolidated statements of financial position.

The following describes the fair value determinations of financial instruments:

- i) Cash: due to the short-term maturity of these instruments, the carrying amount approximates fair value.
- ii) Restricted cash: the carrying amount approximates fair value.
- iii) Trade and other receivables and trade and other payables: the carrying amount approximates fair value due to the short-term maturity of these instruments.
- iv) Borrowing under the revolving credit facility: the carrying amount approximates fair value as the borrowings bear interest at variable rates.
- v) The fair values for the derivative assets and liabilities are estimated using industry standard valuation models. Where applicable, these models project future cash flows and discount the future amounts to a present value using market-based observable inputs including interest rate curves, credit spreads, natural gas prices, foreign exchange rates, and forward and spot prices for currencies.

ROGERS SUGAR INC.

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

11. Financial instruments (continued):

Fair values of financial instruments (continued)

- vi) The fair value of convertible unsecured subordinated debentures was based upon market quotes for the identical instruments.
- vii) See Note 21, Finance lease obligations.
- viii) The fair value of the contingent consideration was discounted and calculated using a probability-weighted expectation (see Note 8, Restricted cash)

The following tables provide a comparison of carrying and fair values for each classification of financial instruments at year-end, and show a level within the fair values hierarchy in which they have been classified.

	Fair values hierarchy level	September 28, 2019		September 29, 2018

	\$	\$
Deferred financing charges, net	925	975
Other	3	10
	928	985

Deferred financing charges represent the fees and costs related to the negotiation of the 5-year credit agreement. Borrowings under the revolving credit facility are short term in nature and can be repaid at any time. Therefore, deferred financing charges are presented separately and not applied against the debt (see Note 17, Revolving credit facility).

ROGERS SUGAR INC.

56

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

16. Goodwill:

	September 28, 2019	September 29, 2018
	\$	\$
Balance, beginning of year	333,007	316,949
Additions through business combination	-	16,058
Goodwill impairment	(50,000)	-
Balance, end of year	283,007	333,007

Recoverability of cash generating units ("CGU"):

For the purpose of impairment testing, goodwill and intangibles with indefinite useful life are allocated to the Company's operating segments, which represent the lowest level within the Company at which the goodwill and intangibles are monitored for internal management purposes, as follows:

	September 28, 2019	September 29, 2018
	\$	\$
Sugar:		
Goodwill	229,952	229,952
Maple products:		
Goodwill	53,055	103,055
Brand names	5,887	5,871
	288,894	338,878

In assessing whether goodwill and indefinite life intangible assets are impaired, the carrying amount of the segments (including goodwill and indefinite life intangible assets) are compared to their recoverable amount. The recoverable amounts of segments are based on the higher of the value in use and fair value less costs of disposal.

Sugar segment

The Company performed the annual impairment review for goodwill and indefinite life intangible assets as at September 28, 2019, and the estimated recoverable amounts exceeded the carrying amounts of the segments and, as a result, there was no impairment identified.

The recoverable amount was based on value in use. The key assumptions used in the estimation of the recoverable amount are set out below. The values assigned to the key assumptions represent management's assessment of future trends in the relevant industries and have been based on historical data from both external and internal sources.

ROGERS SUGAR INC.

57

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

16. Goodwill (continued):

	2019
	%
Pre-tax discount rate	10.6
Terminal growth rate	2.0
Budgeted EBITDA growth rate (average of next 5 years)	6.4

The discount rate was a pre-tax measure estimated based on historical industry weighted-average cost of capital adjusted for impacts on risk and taxes.

The cash flow projections included specific estimates for five years and a terminal growth rate thereafter. The terminal growth rate was based on management's best estimate of the long-term compound annual EBITDA growth rate, consistent with the assumptions that a market participant would make.

Budgeted EBITDA was estimated taking into account past experience, adjusted as follows:

- Revenue growth for the first year was projected taking into account the budgeted sales volumes, and the following years taking into account the average growth levels experienced over the past 5 years and the estimated sales volumes and price growth for the next five years. It was assumed that the sales price would increase in line with forecasted inflation over the next five years.

Management has identified the two key assumptions that could cause the carrying amount to exceed the recoverable amount. The following table shows the amount by which these two assumptions would need to change individually for the estimated recoverable amount to be equal to the carrying amount.

	2019
	%
Pre-tax discount rate	7.3
Budgeted EBITDA growth rate	(6.2)

Maple products segment

The Company performed the annual impairment review for goodwill and indefinite life intangible assets as at September 28, 2019.

The recoverable amount was based on value in use. The key assumptions used in the estimation of the recoverable amount are set out below. The values assigned to the key assumptions represent management's assessment of future trends in the relevant industries and have been based on historical data from both external and internal sources.

ROGERS SUGAR INC.

58

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

16. Goodwill (continued):

	2019
	%
Pre-tax discount rate	13.3
Terminal growth rate	2.8
Budgeted EBITDA growth rate (average of next 5 years)	7.3

The discount rate was a pre-tax measure estimated based on historical industry weighted-average cost of capital adjusted for impacts on risk and taxes.

The cash flow projections included specific estimates for five years and a terminal growth rate thereafter. The terminal growth rate was based on management's best estimate of the long-term compound annual EBITDA growth rate, consistent with the assumptions that a market participant would make.

Budgeted EBITDA was estimated taking into account past experience, adjusted as follows:

- Revenue growth for the first year was projected taking into account the budgeted sales volumes, adjusted for uncertainties, and the following years taking into account the average growth levels experienced in the past and the estimated sales volumes and price growth for the next five years. It was assumed that the sales price would increase in line with forecasted inflation over the next five years.

As a result of the test, the Company recorded a goodwill impairment loss of \$50.0 million in the fiscal year ended September 28, 2019. Following the impairment loss recognised in the maple products segment, the recoverable amount is equal to the carrying amount.

17. Revolving credit facility:

On July 9, 2019, the Company exercised its option to extend the maturity date of its revolving credit facility to June 28, 2024 and made some minor amendments, which do not affect its outstanding borrowings nor its financial covenants. A total of \$0.1 million was paid in financing fees.

On December 20, 2017, the Company amended its existing revolving credit facility thereby increasing its available credit by \$40.0 million by drawing additional funds under the accordion feature embedded in the revolving credit facility ("Additional Accordion Borrowings"). A total of \$0.1 million was paid in financing fees (see Note 14, Other assets).

As a result of the amended revolving credit facility, the Additional Accordion Borrowings and the Additional LBMT Accordion Borrowings, the Company has a total of \$265.0 million of available working capital from which it can borrow at prime rate, LIBOR rate or under bankers' acceptances, plus 20 to 250 basis points, based on achieving certain financial ratios.

ROGERS SUGAR INC.

59

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

17. Revolving credit facility (continued):

Certain assets of the Company, including trade receivables, inventories and property, plant and equipment, have been pledged as security for the revolving credit facility. As at September 28, 2019, a total of \$422.2 million of assets are pledged as security (September 29, 2018 - \$407.8 million).

The following amounts were outstanding as at:

	September 28, 2019	September 29, 2018
	\$	\$
Outstanding amount on revolving credit facility:		
Current	17,000	12,000
Non-current	160,000	160,000
	177,000	172,000

The carrying value of the revolving credit facility approximates fair value as the borrowings bear interest at variable rates.

18. Trade and other payables:

	September 28, 2019	September 29, 2018
	\$	\$
Trade payables	96,150	91,675
Other non-trade payables	2,907	2,754
Personnel-related liabilities	9,238	9,897
Dividends payable to shareholders	9,440	9,451
	117,735	113,777

Considering that Maple products syrup is harvested once a year, the *Producteurs et Productrices Acéricoles du Québec* ("PPAQ") offers to authorized purchasers the possibility to pay their purchases over the course of the year (ending in February). Once the syrup is graded, the Company must pay 30% of the cost of the syrup on the 15th of the following month. The outstanding balance bears interest (prime + 1%) and is paid in four monthly installments (November, December, January and February). Included in trade payables is an amount of \$62.3 million as of September 28, 2019 (September 29, 2018 - \$61.8 million).

During the year, more than 89% of the maple syrup purchases were made from the PPAQ.

Personnel-related liabilities represent the Company's obligation to its current and former employees that are expected to be settled within one year from the reporting period as salary and accrued vacation.

The Company's exposure to currency and liquidity risks related to trade and other payables is disclosed in Note 11, Financial instruments.

	1,697	2,205

Provisions are comprised of asset retirement obligations, which represent the future cost the Company estimated to incur for the removal of asbestos in the operating facilities and for oil, chemical and other hazardous materials storage tanks for which the Company has been able to identify the costs.

The estimate of the total liability for future asset retirement obligations is subject to change, based on amendments to laws and regulations and as new information concerning the Company's operations becomes available. Future changes, if any, to the estimated total liability as a result of amended requirements, laws, regulations and operating assumptions would be recognized prospectively as a change in estimate, when applicable.

(In thousands of dollars except as noted and per share amounts)

21. Finance lease obligations:

The Company leases moveable equipment. These leases have an interest rate of 5.65% with maturity dates in fiscal 2020. The Company also leases a warehouse. This lease has an interest rate of 3.66% with a maturity date in fiscal 2028. The leases substantially transfer all the usage benefits of such equipment and warehouse to the Company.

The outstanding liabilities are as follows:

	September 28, 2019		September 29, 2018	
	Carrying values	Fair values	Carrying values	Fair values
	\$	\$	\$	\$
Finance lease obligations	881	881	114	114

The finance lease obligations are payable as follows:

	September 28, 2019			September 29, 2018		
	Future minimum lease payments	Interest	Present value of minimum lease payments	Future minimum lease payments	Interest	Present value of minimum lease payments
	\$	\$	\$	\$	\$	\$

ROGERS SUGAR INC.

62

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

22. Employee benefits:

The Company sponsors defined benefit pension plans for its employees ("Pension benefit plans"), as well as health care benefits, medical plans and life insurance coverage ("Other benefit plans").

The following table presents a reconciliation of the pension obligations, the plan assets and the funded status of the benefit plans:

	September 28, 2019	September 29, 2018
	\$	\$
Fair value of plan assets:		
Pension benefit plans	105,323	104,362
Defined benefit obligation:		
Pension benefit plans	139,952	120,650
Other benefit plans	17,181	15,206
	157,133	135,856
Funded status:		
Pension benefit plans	(34,628)	(16,288)
Other benefit plans	(17,182)	(15,206)
	(51,810)	(31,494)
Experience adjustment arising on plan liabilities	19,363	(4,911)
Experience adjustment arising on plan assets	(539)	1,732

The Company has determined that, in accordance with the terms and conditions of the defined benefit pension plans, and in accordance with statutory requirements (such as minimum funding requirements) of the plans of the respective jurisdictions, the present value of refunds or reductions in the future contributions is not lower than the balance of the total fair value of the plan assets less the total present value of the obligations. As such, no decrease in the defined benefit asset is necessary as at September 28, 2019 (September 29, 2018 - no decrease in defined benefit asset).

The Company measures its accrued benefit obligations and the fair value of plan assets for accounting purposes at year-end. The most recent actuarial valuations of the pension plans for funding purposes were as of December 31, 2016 and January 1, 2017 and the next required valuations will be as of December 31, 2019.

ROGERS SUGAR INC.

63

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

22. Employee benefits (continued):

The asset allocation of the major categories in the plan was as follows:

	September 28, 2019		September 29, 2018	
	%	\$	%	\$
Equity instruments	61.4	64,668	60.9	63,557
Government bonds	35.4	37,285	36.6	38,196
Cash and short-term securities	3.2	3,370	2.5	2,609
	100.0	105,323	100.0	104,362

The pension committee prepares the documentation relating to the management of asset allocation, reviews the investment policy and recommends it to the Board of Directors for approval in the event of material changes to the policy. Semi-annually monitoring of the asset allocation of the pension benefit plans allows the pension committee to ensure that the limits of asset allocation of the pension benefit plans are respected.

Based on historical data, contributions to the defined benefit pension plans in fiscal 2020 are expected to be approximately \$3.7 million.

The pension plan exposes the Company to the following risks:

(i) Investment risk:

The defined benefit obligation is calculated using a discount rate. If the fund returns are lower than the discount rate, a deficit is created.

(ii) Interest rate risk:

Variation in bond rates will affect the value of the defined benefit obligation.

(iii) Inflation risk:

The defined benefit obligation is calculated assuming a certain level of inflation. An actual inflation higher than expected will have the effect of increasing the value of the defined benefit obligation.

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

22. Employee benefits (continued):

Assumptions regarding future mortality are based on published statistics and mortality tables. The current longevities underlying the value of the liabilities in the defined benefit plans are as follows:

	September 28, 2019	September 29, 2018
Longevity at age 65 for current pensioners:		
Males	22.0	21.9
Females	24.7	24.6
Longevity at age 65 for members aged 45:		
Males	23.5	23.4
Females	26.0	26.0

The assumed health care cost trend rate as at September 28, 2019 was 5.67% (September 29, 2018 - 5.73%), decreasing uniformly to 4.00% in 2040 (September 29, 2018 - 4.00% in 2040) and remaining at that level thereafter.

The following table outlines the key assumptions for the fiscal year ended September 28, 2019 and the sensitivity of a percentage change in each of these assumptions on the defined benefit plan obligations and the net defined benefit plan costs.

The sensitivity analysis provided in the table is hypothetical and should be used with caution. The sensitivities of each key assumption have been calculated independently of any changes in other key assumptions. Actual experience may result in changes in a number of key assumptions simultaneously. Changes in one factor may result in changes in another, which could amplify or reduce the impact of such assumptions.

	For the fiscal year ended September 28, 2019		
	Pension benefit plans	Other benefit plans	Total
	\$	\$	\$
(Decrease) increase in Company's defined benefit obligation:			
Discount rate			
Impact of increase of 1%	(19,241)	(2,228)	(21,469)
Impact of decrease of 1%	24,029	2,833	26,862
Rate of compensation increase			
Impact of increase of 0.5%	908	6	914
Impact of decrease of 0.5%	(1,458)	(5)	(1,463)
Mortality			
99% of expected rate	63	72	135

ROGERS SUGAR INC.

68

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

22. Employee benefits (continued):

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend would have the following effects:

	Increase	Decrease
	\$	\$
Effect on the defined benefit obligations	2,393	(1,927)

As at September 28, 2019, the weighted average duration of the defined benefit obligation amounts to 15.5 years (September 29, 2018 - 14.1 years).

23. Convertible unsecured subordinated debentures:

The outstanding convertible debentures are as follows:

	September 28, 2019	September 29, 2018
	\$	\$
Non-current:		
Sixth series (ii)	57,500	57,500
Seventh series (iii)	97,750	97,750
Total face value	155,250	155,250
Less net deferred financing fees	(5,500)	(6,488)
Less equity component (ii), (iii)	(6,930)	(6,930)
Accretion expense on equity component	1,410	589
Total carrying value - non-current	144,230	142,421

(i) Fifth series:

On March 28, 2018, a portion of the net proceeds from the issuance of the Seventh series, 4.75% convertible unsecured subordinated debentures ("Seventh series debentures") was used to redeem the Fifth series debentures. The total amount redeemed was \$59,990 as an amount of \$10 was converted to 1,388 common shares by holders of the convertible debentures.

23. Convertible unsecured subordinated debentures (continued):

(ii) Sixth series:

On July 28, 2017, the Company issued \$57.5 million Sixth series, 5.00% convertible unsecured subordinated debentures ("Sixth series debentures"), maturing on December 31, 2024, with interest payable semi-annually in arrears on June 30 and December 31 of each year, starting on December 31, 2017. The debentures may be converted at the option of the holder at a conversion price of \$8.26 per share (representing 6,961,259 common shares) at any time prior to maturity, and cannot be redeemed prior to December 31, 2020.

On or after December 31, 2020 and prior to December 31, 2022, the debentures may be redeemed by the Company, at a price equal to the principal amount plus accrued and unpaid interest, only if the current market price on the day preceding the date on which the notice is given is at least 125% of the conversion price of \$8.26. Subsequent to December 31, 2022, the debentures are redeemable at a price equal to the principal amount thereof plus accrued unpaid interest.

On redemption or at maturity, the Company will repay the indebtedness of the convertible debentures by paying an amount equal to the principal amount of the outstanding convertible debentures, together with accrued and unpaid interest thereon.

The Company may, at its option, elect to satisfy its obligation to repay the principal amount of the convertible debentures, which are to be redeemed or which have matured, by issuing shares to the holders of the convertible debentures. The number of shares to be issued will be determined by dividing \$1,000 (one thousand) of principal amount of the convertible debentures by 95% of the then current market price on the day preceding the date fixed for redemption or the maturity date, as the case may be.

The Company allocated \$2.6 million of the Sixth series debentures into an equity component (net of tax an amount of \$2.0 million). During the year, the Company recorded \$303 (September 29, 2018 - \$287) in finance costs for the accretion of the Sixth series debentures.

The Company incurred underwriting fees and issuance costs of \$2.7 million, which are netted against the convertible debenture liability.

The fair value of the Sixth series convertible unsecured subordinated debentures is measured based on Level 1 of the three-tier fair value hierarchy and was based upon market quotes for the identical instruments. The fair value as at September 28, 2019 was approximately \$58.8 million (September 29, 2018 - \$59.2 million).

23. Convertible unsecured subordinated debentures (continued):

(iii) Seventh series:

On March 28, 2018, in connection with a bought deal offering filed on March 21, 2018, the Company issued 85,000 Seventh series debentures, maturing on June 30, 2025 and bears interest of 4.75%, with interest payable semi-annually in arrears on June 30 and December 31 of each year, commencing on June 30, 2018 for gross proceeds of \$85.0 million. Then, on April 3, 2018, the Company issued an additional 12,750 Seventh series debentures pursuant to the exercise in full of the over-allotment option granted by the Company for gross proceeds of \$12.8 million. As a result of the over-allotment, the total amount outstanding under the Seventh series is \$97,750. The debentures may be converted at the option of the holder at a conversion price of \$8.85 per share (representing 11,045,197 common shares) at any time prior to maturity, and cannot be redeemed by the Company prior to June 30, 2021.

On or after June 30, 2021 and prior to June 30, 2023, the debentures will be redeemable in whole or in part from time to time at the option of the Company on not more than 60 days and not less than 30 days prior notice at a price equal to the principal amount thereof plus accrued and unpaid interest, provided that the weighted average trading price of the common shares, for the 20 consecutive trading days ending on the fifth trading day preceding the day prior to the date upon which the notice of redemption is given is at least 125% of the conversion price of \$8.85 per Debenture Share. On or after June 30, 2023 and prior to the maturity date, the debentures may be redeemed at a price equal to the principal amount thereof plus accrued and unpaid interest.

On redemption or on the maturity date, the Company will repay the indebtedness of the convertible debentures by paying an amount equal to the principal amount of the outstanding debentures, together with accrued and unpaid interest thereon.

The Company may, at its option, elect to satisfy its obligation to repay the principal amount of the convertible debentures, which are to be redeemed or which have matured, by issuing shares to the holders of the convertible debentures. The number of shares to be issued will be determined by dividing \$1,000 (one thousand) of principal amount of the convertible debentures by 95% of the then current market price on the day preceding the date fixed for redemption or the maturity date, as the case may be.

The Company allocated \$4.3 million (\$3.1 million net of tax) of the Seventh series debentures into an equity component. During the year, the Company recorded \$518 (September 29, 2018 - \$255) in finance costs for the accretion of the Seventh series debentures.

The Company incurred underwriting fees and issuance costs of \$4.5 million, which are netted against the convertible debenture liability.

The fair value of the Seventh series convertible unsecured subordinated debentures is measured based on Level 1 of the three-tier fair value hierarchy and was based upon market quotes for the identical instruments. The fair value as at September 28, 2019 was approximately \$99.2 million (September 29, 2018 - \$98.2 million).

24. Share capital and other components of equity:

On May 22, 2019, the Company received approval from the Toronto Stock Exchange to proceed with a Normal Course Issuer Bid ("2019 NCIB"), the Company may purchase up to 1,500,000 common shares. The 2019 NCIB commenced on May 24, 2019 and may continue to May 23, 2020. During the year, the Company purchased 122,606 common shares having a book value of \$117 for a total cash consideration of \$640. The excess of the purchase price over the book value of the shares in the amount of \$523 was charged to deficit. All shares purchased were cancelled. In addition, the Company entered into an automatic share purchase agreement with Scotia Capital Inc. in connection with the 2019 NCIB. Under the agreement, Scotia may acquire, at its discretion, common shares on the Company's behalf during certain "black-out" periods, subject to certain parameters as to price and number of shares.

On May 22, 2018, the Company received approval from the Toronto Stock Exchange to proceed with a normal course issuer bid ("2018 NCIB"). Under the 2018 NCIB, the Company was authorized to purchase up to 1,500,000 common shares. The 2018 NCIB commenced on May 24, 2018 and ended on May 23, 2019. In fiscal 2018, the Company purchased 736,900 common shares having a book value of \$706 for a total cash consideration of \$3,963. The excess of the purchase price over the book value of the shares in the amount of \$3,257 was charged to deficit. All shares purchased were cancelled.

In fiscal 2018, a total of \$10 of the Fifth series debentures was converted by holders of the securities for a total of 1,388 common shares. This conversion is a non-cash transaction and therefore not reflected in the audited consolidated financial statement of cash flow. See Note 23, Convertible unsecured subordinated debentures.

As of September 28, 2019, a total of 104,885,464 common shares (September 29, 2018-105,008,070) were outstanding.

The Company declared a quarterly dividend of \$0.09 per share for fiscal years 2019 and 2018. The following dividends were declared by the Company:

	For the fiscal years ended	
	September 28, 2019	September 29, 2018
	\$	\$
Dividends	37,793	37,971

Contributed surplus:

The contributed surplus account is used to record amounts arising on the issue of equity-settled share-based payment awards (see Note 25, Share-based compensation).

24. Share capital and other components of equity (continued):

Capital management:

The Company's objectives when managing capital are:

- To ensure proper capital investment is done in the manufacturing infrastructure to provide stability and competitiveness of the operations;
- To have stability in the dividends paid to shareholders;
- To have appropriate cash reserves on hand to protect the level of dividends made to shareholders;
- To maintain an appropriate debt level so that there is no financial constraint on the use of capital;
- To have an appropriate line of credit, and;
- To repurchase shares or convertible debentures when trading values do not reflect fair values.

The Company typically invests in its operations approximately \$20.0 million yearly in capital expenditures. On an exceptional basis, the Company may invest more than \$20.0 million when special capital requirements arise. Management believes that these investments, combined with approximately \$30.0 to \$35.0 million spent on average annually on maintenance expenses, allow for the stability of the manufacturing operations and improve its cost competitiveness through new technology or process procedures.

The Board of Directors aims to ensure proper cash reserves are in place to maintain the current dividend level. Dividends to shareholders will only be raised after the Directors have carefully assessed a variety of factors that include the overall competitive landscape, volume and selling margin sustainability, the operating performance and capital requirements of the manufacturing plants and the sustainability of any increase.

The Company has a \$265.0 million revolving credit facility. The Company estimates to use between \$100.0 million and \$180.0 million of its revolving credit facility to finance its normal operations during the year.

The Company monitors, on a quarterly basis, the ratio of total debt to earnings before interest, income taxes, depreciation and amortization, adjusted for the impact of all derivative financial instruments ("adjusted EBITDA") of the operating company. Through required lenders' covenants, the debt ratio must be kept below 4:1 in order not to have restrictions on interest payments from Lantic to the Company up to a year after an acquisition and below 3.5:1 thereafter. At year-end, the operating company's debt ratio was 1.96:1 for fiscal 2019 and 1.58:1 for fiscal 2018.

Having satisfied the above factors, if cash is available, it will be used to repurchase the Company's shares and convertible debentures when the Board of Directors considers that the current trading range does not reflect the fair trading value of the Company's shares. As such, the Company puts in place a NCIB from time to time.

The Company does not use equity ratios to manage its capital requirements.

25. Share-based compensation:

(a) Equity-settled share-based compensation:

The Company has reserved and set aside for issuance an aggregate of 4,000,000 common shares (September 29, 2018 - 4,000,000 common shares) at a price equal to the average market price of transactions during the last five trading days prior to the grant date. Options are exercisable to a maximum of 20% of the optioned shares per year, starting after the first anniversary date of the granting of the options and will expire after a term of ten years. Upon termination, resignation, retirement, death or long-term disability, all share options granted under the Share Option Plan not vested shall be forfeited.

On December 3, 2018, a total of 447,175 share options were granted at a price of \$5.58 per common share to certain executives.

On December 4, 2017, a total of 1,065,322 share options were granted at a price of \$6.23 per common share to certain executives and senior managers. During fiscal 2018, a total of 60,000 share options were forfeited following the departure of a senior manager.

Compensation expense is amortized over the vesting period of the corresponding optioned shares and is expensed in the administration and selling expenses with an offsetting credit to contributed surplus. An expense of \$190 was incurred for the fiscal year ended September 28, 2019 (September 29, 2018 - \$189).

The following table summarizes information about the Share Option Plan as of September 28, 2019:

Exercise price per option	Outstanding number of options at September 29, 2018	Options granted during the period	Options forfeited during the period	Options exercised during the period	Outstanding number of options at September 28, 2019	Weighted average remaining life	Number of options exercisable
\$4.59	830,000	-	-	-	830,000	5.65	660,000
\$5.58	-	447,175	-	-	447,175	9.18	-

25. Share-based compensation (continued):

(a) Equity-settled share-based compensation (continued):

The following table summarizes information about the Share Option Plan as of September 29, 2018:

Exercise price per option	Outstanding number of options at September 30, 2017	Options granted during the period	Options forfeited during the period	Outstanding number of options at September 29, 2018	Weighted average remaining life	Number of options exercisable
\$4.59	830,000	-	-	830,000	6.65	490,000
\$5.61	80,000	-	-	80,000	3.45	80,000
\$6.23	-	1,065,322	(60,000)	1,005,322	9.35	-
\$6.51	360,000	-	-	360,000	8.17	72,000
	1,270,000	1,065,322	(60,000)	2,275,322	n/a	642,000

Options outstanding held by key management personnel amounted to 2,102,497 options as at September 28, 2019 and 1,655,322 options as at September 29, 2018 (see Note 31, Key management personnel).

The measurement date fair values were measured based on the Black-Scholes option pricing model. Expected volatility is estimated by considering historic average share price volatility. The inputs used in the measurement of the fair values of the share-based payment plans granted in the first quarter of fiscal 2019 are the following:

Total fair value of options at grant date	\$141
Share price at grant date	\$5.75
Exercise price	\$5.58
Expected volatility (weighted average volatility)	15.688% to 17.166%
Option life (expected weighted average life)	4 to 6 years
Expected dividends	6.26%
Weighted average risk-free interest rate (based on government bonds)	1.842% to 1.853%

(b) Cash-settled share-based compensation:

(i) Share Appreciation Rights ("SAR"):

In fiscal 2017, a SAR plan was created under the existing Share Option Plan that entitle the grantee to a cash payment based on the increase in the share price of the Company's common shares from the grant date to the settlement date. On December 5, 2017, a total of 125,000 SARs were granted at a price of \$6.51 to an executive.

Compensation expense is amortized over the vesting period of the corresponding optioned shares and is expensed in the administration and selling expenses with an offsetting debit / credit to liability. A gain on fair value change of \$2 was recorded for the fiscal year ended September 28, 2019 (September 29, 2018 – a gain of \$5). The liabilities arising from the SARs as at September 28, 2019 were \$8 (September 29, 2018 - \$10).

ROGERS SUGAR INC.

75

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

25. Share-based compensation (continued):

(b) Cash-settled share-based compensation (continued):

(i) Share Appreciation Rights ("SAR") (continued):

The following table summarizes information about the SARs as of September 28, 2019:

Share price per unit	Outstanding number of SARs at September 29, 2018	SARs granted during the period	SARs exercised during the period	SARs forfeited during the period	Outstanding number of SARs at September 28, 2019	Number of SARs exercisable
\$6.51	125,000	-	-	-	125,000	50,000

The following table summarizes information about the Share Option Plan as of September 29, 2018:

Share price per unit	Outstanding number of SARs at September 30, 2017	SARs granted during the period	SARs exercised during the period	SARs forfeited during the period	Outstanding number of SARs at September 29, 2018	Number of SARs exercisable
\$6.51	125,000	-	-	-	125,000	25,000

The fair values at the measurement date were measured based on the Black-Scholes option pricing model. Expected volatility is estimated by considering historic average share price volatility. The inputs used in the measurement of the fair values of the SARs granted are the following:

SARs granted December 5, 2016	Grant date	Measurement date as at September 28, 2019
Total fair value of options	\$53	\$9
Share price	\$6.63	\$5.34
Exercise price	\$6.51	\$6.51
Expected volatility (weighted average volatility)	16.520% to 18.670%	15.128% to 16.823%
Option life (expected weighted average life)	2 to 6 years	6 to 10 years
Expected dividends	5.43%	6.74%
Weighted average risk-free interest rate (based on government bonds)	0.740% to 1.160%	1.367% to 1.391%

The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the SARs is indicative of future trends, which may not necessarily be the actual outcome.

25. Share-based compensation (continued):

(b) Cash-settled share-based compensation (continued):

(ii) Performance Share Units ("PSU"):

Fiscal 2018 grant:

In fiscal 2018, a PSU plan was created. On December 4, 2017, an aggregate of 224,761 PSUs having been granted by the Company at a share price of \$6.31. In addition, an aggregate of 15,274 PSUs (September 29, 2018 - 10,291 PSUs) at a weighted-average share price of \$5.68 (September 29, 2018 \$6.01) were allocated as a result of the dividend paid during the last four quarters, as the participants also receive dividend equivalents paid in the form of PSU's. As at September 28, 2019, an aggregate of 250,326 PSUs are outstanding.

These PSUs will vest at the end of the 2018-2020 Performance Cycle based on the achievement of total shareholder returns set by the Human Resources and Compensation Committee ("HRCC") and the Board of Directors of the Company. Following the end of a Performance Cycle, the Board of Directors of the Company will determine, and to the extent only that the Vesting Conditions include financial conditions, concurrently with the release of the Company's financial and/or operational results for the fiscal year ended at the end of the Performance Cycle, whether the Vesting Conditions for the PSUs granted to a participant relating to such Performance Cycle have been achieved. Depending on the achievement of the Vesting Conditions, between 0% and 200% of the PSUs will become vested.

The Board of Directors of the Company has the discretion to determine that all or a portion of the PSUs granted to a participant for which the Vesting Conditions have not been achieved shall vest to such participant.

The value to be paid-out to each participant will be equal to the result of: the number of PSUs granted to the participant which have vested, multiplied by the volume weighted average closing price of the Common Shares on the Toronto Stock Exchange (the "TSX") for the five trading days immediately preceding the day on which the Company shall pay the value to the participant under the PSU Plan, and such date will in no event occur after December 31 of the third calendar year following the calendar year in which the PSUs are granted.

The fair value as at September 28, 2019 was nil (September 29, 2018 - nil). An expense of nil was recorded for the period ending September 28, 2019 (September 29, 2018 - nil) in administration and selling expenses. The liabilities arising from the PSUs as at September 28, 2019 were nil (September 29, 2018 - nil).

25. Share-based compensation (continued):

(b) Cash-settled share-based compensation (continued):

(ii) Performance Share Units ("PSU") (continued):

Fiscal 2019 grant:

On December 3, 2018, an aggregate of 290,448 PSUs was granted by the Company at a share price of \$5.60. In addition, an aggregate of 13,858 at a weighted-average share price of \$5.76 were allocated as a result of the dividend paid during the year, as the participants also receive dividend equivalents paid in the form of PSU's. As at September 28, 2019, an aggregate of 304,306 PSUs are outstanding.

These PSUs will vest at the end of the 2019-2021 Performance Cycle based on the achievement of total shareholder returns set by the Human Resources and Compensation Committee ("HRCC") and the Board of Directors of the Company. Following the end of a Performance Cycle, the Board of Directors of the Company will determine, and to the extent only that the Vesting Conditions include financial conditions, concurrently with the release of the Company's financial and/or operational results for the fiscal year ended at the end of the Performance Cycle, whether the Vesting Conditions for the PSUs granted to a participant relating to such Performance Cycle have been achieved. Depending on the achievement of the Vesting Conditions, between 0% and 200% of the PSUs will become vested.

The Board of Directors of the Company has the discretion to determine that all or a portion of the PSUs granted to a participant for which the Vesting Conditions have not been achieved shall vest to such participant.

The value to be paid-out to each participant will be equal to the result of: the number of PSUs granted to the participant which have vested, multiplied by the volume weighted average closing price of the Common Shares on the Toronto Stock Exchange (the "TSX") for the five trading days immediately preceding the day on which the Company shall pay the value to the participant under the PSU Plan, and such date will in no event occur after December 31 of the third calendar year following the calendar year in which the PSUs are granted.

The fair values were established using the Monte Carlo model. The fair value as at grant date was \$308 and \$35 as at September 28, 2019. An expense of \$7 was recorded for the period ending September 28, 2019 in administration and selling expenses. The liabilities arising from the PSUs as at September 28, 2019 were \$7.

26. Operating leases:

The Company has financial commitments for minimum lease payments under operating leases for various mobile equipment and the premises for the sugar and maple product segments. Non-cancellable operating lease rentals are payable as follows:

	September 28, 2019	September 29, 2018
	\$	\$
Less than 1 year	3,439	2,581
Between 1 and 5 years	9,378	5,128
More than 5 years	8,113	956
	20,930	8,665

For the fiscal year ended September 28, 2019, an amount of \$5.4 million was recognized as an expense in net (loss) earnings with respect to operating leases (September 29, 2018 - \$3.9 million).

27. Commitments:

During fiscal 2019, TMTC entered into an agreement to lease a new premise in Granby for a total committed value of approximately \$9.4 million over a fifteen year period. The lease will start on November 1, 2019.

As at September 28, 2019, the Company had commitments to purchase a total of 1,057,000 metric tonnes of raw cane sugar (September 29, 2018 - 1,337,000), of which 283,162 metric tonnes had been priced (September 29, 2018 - 316,128), for a total dollar commitment of \$113.9 million (September 29, 2018 - \$120.8 million). In addition, the Company has a commitment of approximately \$25.0 million (September 29, 2018 - \$43.5 million) for sugar beets to be harvested and processed in fiscal 2019.

TMTC has \$8.8 million (September 29, 2018 - \$18.9 million) remaining to pay related to an agreement to purchase approximately \$13.9 million (4.3 million pounds) (September 29, 2018 - \$38.2 million; 12.8 million pounds) of maple syrup from the PPAQ. In order to secure bulk syrup purchases, the Company issued letters of guarantee for a total amount of \$17.3 million in favor of the PPAQ (September 29, 2018 - \$16.0 million). The letters of guarantee expire on March 31, 2020.

During the fiscal year ended September 28, 2019, the Company entered into capital commitments to complete its capital projects for a total value of \$19.0 million (September 29, 2018 - \$19.6 million).

ROGERS SUGAR INC.

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

28. Contingencies:

The Company is subject to laws and regulations concerning the environment and to the risk of environmental liability inherent to its activities relating to its past and present operations.

The Company, in the normal course of business, becomes involved from time to time in litigation and claims. While the final outcome with respect to claims and legal proceedings pending as at September 28, 2019 cannot be predicted with certainty, management believes that no provision was required and that the financial impact, if any, from claims related to normal business activities will not be material.

29. (Loss) Earnings per share:

Reconciliation between basic and diluted (loss) earnings per share is as follows:

	For the fiscal years ended	
	September 28, 2019	September 29, 2018
	\$	\$
Basic (loss) earnings per share:		
Net (loss) earnings	(8,167)	48,729
Weighted average number of shares outstanding	104,997,204	105,600,860
Basic (loss) earnings per share	(0.08)	0.46
Diluted (loss) earnings per share:		
Net (loss) earnings	(8,167)	48,729
Plus impact of convertible unsecured subordinated debentures and share options	-	5,694
	(8,167)	54,423
Weighted average number of shares outstanding:		
Basic weighted average number of shares outstanding	104,997,204	105,600,860
Plus impact of convertible unsecured subordinated debentures and share options	-	22,173,123
	104,997,204	127,773,983
Diluted (loss) earnings per share	(0.08)	0.43

As at September 28, 2019, the share options, the Sixth series debentures, representing 6,961,259 common shares and the Seventh series debentures, representing 11,045,198 common shares, were excluded from the calculation of diluted loss per share as they were deemed anti-dilutive. As at September 29, 2018, the 87,731 share options were excluded from the calculation of diluted earnings per share as they were deemed anti-dilutive.

32. Personnel expenses (continued):

The personnel expenses were charged to the consolidated statements of (loss) earnings and comprehensive (loss) income or capitalized in the consolidated statements of financial position as follows:

	For the fiscal years ended	
	September 28, 2019	September 29, 2018
	\$	\$
Cost of sales	78,972	72,173
Administration and selling expenses	14,928	17,234
Distribution expenses	1,582	1,434
	95,482	90,841
Property, plant and equipment	355	434
	95,837	91,275

33. Related parties:

Lantic has outstanding redeemable Class B special shares of \$44.5 million that are retractable and can be settled at Lantic's option by delivery of a note receivable from Belkorp Industries Inc., having the same value. The note receivable bears no interest and has no fixed terms of repayment. The Class B special shares are entitled to vote, but on a pro rata basis at a meeting of shareholders of Lantic. Under the terms of a voting trust agreement between Belkorp Industries Inc. and Rogers, Rogers is entitled to vote the Class B special shares so long as they remain outstanding. Due to the fact that Lantic has the intent and the legal right to settle the note receivable with the redeemable Class B special shares, these amounts have been offset and, therefore, are not presented on the consolidated statements of financial position.

Belkorp Industries Inc. also controls, through Lantic Capital, the two Lantic Class C shares issued and outstanding. The Class C shares entitle Lantic Capital to elect five of the seven directors of Lantic, but have no other voting rights at any meetings of shareholders of Lantic, except as may be required by law.

34. Segmented information:

The Company has two operating and reportable segments, sugar and maple products. The principal business activity of the sugar segment is the refining, packaging and marketing of sugar products. The Maple products segment processes pure maple syrup and related maple products. The reportable segments are managed independently as they require different technology and capital resources. Performance is measured based on the segments' gross margins and results from operating activities. These measures are included in the internal management reports that are reviewed by the Company's President and CEO, and management believes that such information is the most relevant in the evaluation of the results of the segments.

ROGERS SUGAR INC.

82

Notes to consolidated financial statements (continued)

(In thousands of dollars except as noted and per share amounts)

34. Segmented information (continued):

Transactions between reportable segments are interest receivable (payable), which are eliminated upon consolidation.
